Kingsport Economic Development Board 415 Broad Street Kingsport, Tennessee 37660

PREPARED BY:

S&ME, Inc. 268 Christian Church Road, Suite 1 Johnson City, Tennessee 37615

March 21, 2023

March 21, 2023

Kingsport Economic Development Board 415 Broad Street Kingsport, Tennessee 37660

Attention: Mr. John Rose, Economic Development Director

Reference: Phase I Environmental Site Assessment

435 Press Street, Tax Parcel 046I A 024.00

Kingsport, Tennessee

S&ME Project No. 23400004

Dear Mr. Rose:

S&ME, Inc. (S&ME) has completed the Phase I Environmental Site Assessment (ESA) for the referenced property. The attached report presents the results of S&ME's assessment of the site, which was performed in accordance with the ASTM International E1527-13 and S&ME Proposal No. 23400004, dated January 24, 2023. The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions in connection with the property.

ASTM E1527-13 states that an Environmental Site Assessment "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition or intended transaction is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared and the following components were completed: interviews, the regulatory review, site visit, and the declaration by the environmental professional responsible for the assessment.

S&ME appreciates the opportunity to provide this Phase I ESA for your project. Please contact us at (423) 612-3043 at your convenience if there are questions regarding the information contained in this report.

Sincerely,

S&ME, Inc.

Carol Goldinger Ford P.G.

Caul Soldize Fal

♦ Executive Summary

S&ME, Inc. (S&ME) has performed a Phase I Environmental Site Assessment (ESA) of the subject property (Tax Parcel 046I A 024.00) located at 435 Press Street, Kingsport, Tennessee. The following summary is intended as an overview of the Phase I ESA and does not include the complete findings and opinions of the full report.

The subject property consists of one parcel comprising approximately 3.1 acres. The subject property consists of six interconnected buildings for a total of 111,000 square feet according to the current owner and User provided documents. The buildings are listed on the National Register of Historic Places. The current use of the facility consists of rental space for storage for Paul Bellamy Furniture (Building 1, 3, 4, and 5), Salvage Warehouse (Building 2) and Atlas Culinary (Building 6). The area around the facility includes primarily gravel and asphalt parking in front of Atlas Culinary. The subject property is served by public water, sewer, and natural gas. The subject property was not identified within the ASTM International (ASTM) minimum search distances with the exception of the former Tobacco Road located in the vicinity of northwestern property limits as an historic auto.

Historical records indicate that the subject property was developed as early as 1917, based on the owner interview.

Thirty-one off-site regulated facilities were identified within the search distances for the EDR database search. Twenty-nine off-site facilities are not considered recognized environmental conditions (RECs) based upon their lower topographic position relative to the subject property, cross gradient to the subject property, lack of documented releases, regulatory status of documented releases, and/or distance from the subject property.

Based on the results of this Phase I ESA, S&ME identified no evidence of RECs, CRECs, or HRECs in connection with the subject property expect for the following: one gasoline tank identified on the 1925 Sanborn Map on the subject property (REC), Quebecor which is down gradient/cross gradient from the subject property (CREC), and Regions Bank (et. al.) which is upgradient from the subject property (CREC).

Based upon historical records, regulatory databases and records, and on-site observations, a Vapor Encroachment Condition from off-site sources does exist. This VEC determination is based upon proximity of a non-petroleum release from Quebecor property and Regions Bank property petroleum release located upgradient of the subject property.

1.0 Introduction

S&ME, Inc. (S&ME) conducted a Phase I Environmental Site Assessment (ESA) of the approximately 3.1-acre property located at 435 Press Street, Kingsport, Tennessee. The Phase I ESA was conducted using the ASTM International (ASTM) *E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and in accordance with S&ME Proposal No. 23400004, dated January 24, 2023.

1.1 Purpose

The purpose of the Phase I ESA is to identify, pursuant to ASTM E1527-13, recognized environmental conditions (RECs) and controlled recognized environmental conditions (CRECs) in connection with the property. It is S&ME's understanding that the Phase I ESA is being performed for a property transaction.

ASTM defines an REC as the presence or likely presence of hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.

ASTM defines a CREC as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

ASTM defines the term historical recognized environmental condition (HREC) as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The terms do not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs or CRECs.

1.2 Detailed Scope of Services

1.2.1 ASTM E1527-13

S&ME's approach to performing this Phase I ESA consisted of four major tasks in accordance with ASTM Standard Practice E1527-13.

<u>Task 1</u> – A review of reasonably ascertainable public records for the site and the immediate vicinity was conducted. This review was performed to characterize environmental features of the site and to identify past and

present land use activities, on or in the vicinity of the site, which may indicate a potential for RECs. The review of the reasonably ascertainable public records included:

- 1. Examination of federal, state, tribal and reasonably ascertainable local public records for the site and immediate vicinity.
- 2. Examination of one or more of the following standard sources: aerial photographs, fire insurance maps, tax files, building department records, zoning/land use records, street directories and topographic maps of the site and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.
- 3. Examination of land title records back to 1940, or first developed use whichever is earlier, as well as a copy of the current deed if the documents are provided to S&ME by the Phase I ESA User.

<u>Task 2</u> – A site reconnaissance was performed to identify visual signs of past or existing contamination on or adjacent to the site. This reconnaissance was also performed to evaluate evidence found in the public record review that might indicate activities resulting in hazardous substances or petroleum products being used or deposited on the site. The site reconnaissance included the following activities:

- A reconnaissance of the site and adjacent properties was performed to look for evidence of current and
 past property uses, signs of spills, stressed vegetation, buried waste, underground storage tanks (USTs) or
 above ground storage tanks (ASTs), subsidence, transformers, or unusual soil discoloration which may
 indicate the possible presence of contaminants on the properties. Photographs are provided to
 document these conditions.
- 2. The exterior reconnaissance involved a viewing of the periphery of the property and a walk-through of accessible areas of the site interior including the exterior of on-site structures, if present.
- 3. The interior reconnaissance involved a walk-through of the interior of all accessible structures, if present.

<u>Task 3</u> – Interviews with past and present property owners (if available), operators and occupants as well as with appropriate local officials were conducted to consider any local knowledge of hazardous substances or petroleum products on the property or on adjacent properties.

Task 4 – Report preparation and review.

1.2.2 Exclusions from and Additions to Scope of Services

Unless specifically authorized as an addition to the Phase I ESA work scope, the assessment did not include any assessment of environmental conditions not specifically included in the ASTM E1527-13 standard including, but not limited to sampling of materials (i.e., soil, surface water, groundwater or air), or the assessment of business risk issues such as asbestos containing materials (ACM); lead-based paint; lead in drinking water; mold, fungi or bacteria in on-site buildings; regulatory compliance; cultural/historic risks; wetlands; industrial hygiene; health/safety; ecological resources; endangered species; indoor air quality; vapor intrusion; radon or high voltage power lines.

The Phase I ESA is limited to the range of contaminants identified as hazardous substances by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and petroleum products. Compounds that are not defined by CERCLA as a hazardous substance, including emerging contaminants such as polyfluoroalkyl

substances (PFAS), are excluded. Similarly, Controlled Substances as defined in the Controlled Substances Act (21 U.S.C. §802) are excluded.

1.2.3 Viability of the Phase I ESA

ASTM E1527-13 states that a Phase I ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition or intended transaction is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared. The components of the practice that must be completed within 180 days prior include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. If these components were not completed within 180 days, or if the report is to be used by an entity other than the User for whom the assessment was originally prepared, additional information is required to comply with the ASTM E1527-13 practice.

1.3 Significant Assumptions

Information obtained from the User, the User's representatives, individuals interviewed, and prior environmental reports was considered accurate unless S&ME's reasonable inquiries clearly revealed otherwise.

The groundwater within the local geologic province is typically contained in an unconfined (water table) aquifer. The slope of the water table under static conditions (no pumping interference) often approximates the land surface topography. Thus, the interpreted groundwater flow direction is assumed to be approximately the same as the topography of the ground surface. Perennial surface waters (creeks, streams, rivers, ponds, etc.) are assumed to act as a discharge point for groundwater flow.

1.4 Limitations of the Assessment

The Phase I ESA was conducted using ASTM E1527-13. The findings of this report are applicable, and representative of conditions encountered at the property on the date of this assessment and may not represent conditions at a later date. The review of public records was limited to that information which was available to S&ME at the time this report was prepared. Interviews with local and state government authorities were limited to those people whom S&ME was able to contact during the preparation of this report. Information was derived from "reasonably ascertainable" and "practically reviewable" sources in compliance with our understanding of the standards set forth by ASTM E1527-13.

The opinions presented in this report are based on findings derived from a site reconnaissance, a review of specified regulatory records and historical sources, and comments made by interviewees. Generally, information obtained from public records and from interviews is reliable. However, S&ME cannot warrant or guarantee that the information provided is complete or accurate. In the event responses requested by S&ME from public agencies are provided to S&ME following the submittal of our report, they will be forwarded to the User in the form received for evaluation by the User.

Limitations were encountered during the performance of this assessment. The history of the subject property was not documented within approximately five-year intervals because standard historical sources were either not available or not observed at five-year intervals. This limitation is not considered significant. Most all areas of the

buildings were observed except for the crawlspace beneath the single-story Building 2 and Atlas Culinary (Building 6). Most of the interior portions of Atlas Culinary were observed through the windows. This limitation is not considered significant.

1.5 Special Terms and Conditions

This Phase I ESA was conducted in accordance with S&ME Proposal No. 23400004, dated January 24, 2023, and Agreement for Services of the same date.

1.6 User Reliance

The resulting report is provided for the use of Kingsport Economic Development Board. Use of this report by any third parties will be at such party's sole risk except when granted under written permission by S&ME. Any such authorized use or reliance by third parties will be subject to the same Agreement under which the work was conducted for Kingsport Economic Development Board.

The additional party's use and reliance on the report will be subject to the same rights, obligations, and limitations imposed upon Kingsport Economic Development Board by the Agreement. However, the <u>total</u> liability of S&ME to all parties of the Phase I ESA shall be limited to the remedies and amounts as provided in the Agreement as a single contract. The additional party's use and reliance on the report shall signify the additional party's agreement to be bound by the proposal and contract that make up the Agreement between S&ME and Kingsport Economic Development Board.

2.0 General Site Description

2.1 Site Location

The subject property consists of one parcel in Rogersville, Tennessee. The location of the subject property is shown on Figures 1 through 3 in Appendix I. According to the Tennessee Property Viewers website (tnmap.tn.gov/assessment), the subject property consists of one parcel identified as 046I A 024.00 and the owner is listed as Dobyns Taylor Hardware.

Table 2-1 – Site Characteristics

Item	Comments
Subject Property Address	435 Press Street, Kingsport, Tennessee
Subject Property Location	Located in the corner of Clinchfield and Press Streets
Number of Parcels and Acreage	One parcel, approximately 3.1 acres
Number of Building(s) and Square Footage	Six buildings, approximately 111,000 square feet total
Current Property Use	Warehouse
Current Zoning	Not listed

2.2 Site Vicinity and Characteristics

The subject property consists of six interconnected buildings previously used to manufacture hosiery and later used as a hardware store and warehouses. The area surrounding the facility includes some asphalt, gravel, limited landscaping, loading docks, and city streets. The surrounding properties include commercial and residential properties.

3.0 User Provided Information

3.1 Title Records

The User did not provide S&ME with title records for review, and S&ME was not engaged to secure a title report as part of the Services. S&ME reviewed the current tax assessor information and aerial tax map photographs on the Tennessee Property Viewer website. The current owner of the parcel comprising the subject property are listed as warehouse. No potential environmental concerns were noted on the available records pertaining to the subject property that were obtained and reviewed by S&ME.

3.2 Environmental Liens or Activity and Use Limitations

Review of Activity and Use Limitations (AULs) and environmental liens by the environmental professional can help in determining if a REC is associated with the property. AULs can include both institutional and engineering controls and are often recorded in land title records in the restrictions of record rather than a typical chain-of-title or title abstract. The User has the responsibility of checking land title and judicial (federal, state, tribal and local) records.

No lien/AUL search was provided by the User, and no information regarding environmental liens, AULs, or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to S&ME by the User, except for the possibility of land use restrictions and historical media impacts to a portion of the subject property.

3.3 Specialized Knowledge

The User was knowledgeable of the historic and current operation(s) of the facility. A questionnaire and checklist were completed by the User and are included in Appendix new paV.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information about the subject property within the local community that was material to RECs in connection with the property was reported to S&ME by the User.

3.5 Valuation Reduction for Environmental Issues

The User indicated that the valuation of the purchase price of the subject property reasonably reflect fair market value of the property.

3.6 Owner, Property Manager, and Occupant Information

According to the Tennessee Property Viewer website, the subject property consists of one parcel identified as Tax Parcel 046l A 024.00 owned by Dobyns Taylor Hardware. The subject property is currently partially occupied by Paul Bellamy (used as storage for furniture), Atlas Culinary (baking and cooking classes), and Salvage Warehouse (used to store product), and the remaining portion of the building space is empty.

3.7 Reason for Performing the Phase I ESA

It is our understanding that the Phase I ESA is being conducted in order to facilitate a financial transaction. The purpose of the Phase I ESA is to identify, pursuant to ASTM E1527-13, RECs in connection with the property. S&ME assumes that this Phase I ESA is being performed to assist the property owner in qualifying for the innocent landowner, contiguous property owner, or *bona fide* prospective purchaser limitations on CERCLA liability.

3.8 Other

No other information was provided to S&ME by the User.

4.0 Records Review

4.1 Standard Environmental Record Sources

S&ME reviewed the regulatory lists obtained from Environmental Data Resources (EDR). EDR contacts regulatory agencies on a periodic basis to update identified databases. S&ME reviewed selected regulatory agency files for identified facilities which are located within the search radii as established by ASTM E1527-13. The extent of the search radii varies according to the activities and/or materials produced at each facility. The EDR environmental records report is included in Appendix II and contains detailed information regarding the release date and search distance for each database researched, search radii, an explanation of each database, and figures depicting the approximate location of regulated facilities in the vicinity of the subject property.

Regulatory listings are limited and include only those facilities or incidents that are known to the regulatory agencies at the time of publication to be contaminated, in the process of evaluation for potential contamination, or to store/generate potentially hazardous substances, waste, or petroleum. The Phase I ESA search radii are listed below. The numbers of sites and facilities listed in the EDR database have been revised to correct for duplicated listings, facility name variants, or facilities that have assumed identical operations of another business at the same address location.

Table 4-1 – Federal Environmental Record Sources

UST	0.25 mile	7
AST	0.25 mile	0
HIST UST	0.25 mile	8
NPDES	Target Property	0
VAPOR	0.5 mile	1

The subject property was not identified within the ASTM minimum search distances provided by EDR. Thirty-two off-site regulated facilities were identified within the search distances for the EDR database search. Additional information obtained from state agency files is briefly discussed in Section 4.1.1.

Table 4-3 – Database Search Results

Facility	Location Distance/Direction	Record	Comments
Quebecor Printing	335 Roller Street 650 ft. WNW (by EDR) 90 ft. WNW (actual)	VAPOR, INST CONTROL, VCP, SRP, NPDES	EDR documents indicate the site is in the Site Remediation Program with contamination impacted soil and groundwater from acetone, benzene, ethylbenzene, isopropanol, toluene, and 2-butanone. Agency files indicate soil, groundwater, and free product were present on the site. Site also has land use restrictions and a brownfield voluntary agreement in place. The site is a VEC and a CREC in connection with the subject property.
Town Loft Apartments (a.k.a. Old Roberts and Johnson Lumber Yard	452 Press Street 346 ft. NNW	LUST, UST, HIST UST, VCP, SRP	EDR documents indicate a portion of this site contained a 2,000-gallon UST noted as permanently out of use. Agency files indicate the site received a UST regulatory closure letter in 2004 related to a leaking gasoline tank after soil and groundwater contamination was identified and monitored. Based on downgradient position and distance this does not constitute a REC in connection with the subject property.

Facility	Location Distance/Direction	Record	Comments
Food City Gas N Go	304 Clinchfield Street 346 ft. NNW	UST	EDR documents do not include any releases for this site which has three USTs install in 2011. Agency files also indicate no releases for this site. This site does not constitute a REC in connection with the subject property.
Regions Bank (a.k.a. Texaco, Duffer-Taylor General Tire and Kennedy's Pat Auto Repair)	437 and 461 West Center Street 600 ft. S	VCP, SRP, LUST, UST, HIST UST, HIST AUTO	EDR documents the site contained four gasoline USTs permanently out of use. Agency files indicate the site had four USTs including one diesel tank, one waste oil tank, and two gasoline tanks. Contaminated soil was over-excavated at the site and the site received a regulatory closure letter in 1993. The site is upgradient of the subject property with noted petroleum soil contamination and petroleum and chlorinated solvent soil gas contamination. The site has land use restrictions in place through VCP/SRP. This site is considered a VEC and a CREC in connection with the subject property.
Kingsport Transit	109/140 Clay Street 1400 – 1672 ft. S	LUST, INST CONTROL, VCP, SRP	EDR documents indicate the site includes leaking USTs, with land use restrictions and the site was also a VCP and SRP site. Agency files indicate several USTs and offsite sources may have contributed to the groundwater contamination at this site. The site is up gradient to cross gradient of the subject property and is not considered a REC or VEC based on distance from the subject property.

The remaining 26 sites identified in the EDR databases were either located downgradient, cross gradient or upgradient at a distance from the subject property which would deem the sites to not be considered RECs in connection with the subject property. S&ME also reviewed the list of orphan/unmappable sites and zip code listing in the EDR database report for facilities within the ASTM minimum search distances. No additional sites were listed in the EDR orphan/unmappable sites which correspond to sites within the ASTM minimum search distances.

March 21, 2023

4.1.1 State Agency File Review

Regulatory agency files for several nearby UST and Division of Remediation (DoR) sites were reviewed and are discussed below.

Quebecor regulatory files indicated a leak was detected in an underground transmission line in 1985 which was connected to an above ground storage tank (AST). The tank reportedly contained acetone, toluene, methyl ethyl ketone (2-butanone), and xylenes. Quantities of lost product ranged from 2,000 to 4,000 gallons. Free product and contaminated groundwater and soils were encountered at the site in 1988 during well installation activities and remedial measures were implemented to pump and remove the free product. Vinyl chloride was later detected in the groundwater (post 1992). Site entered into a Brownfield Consent Order & Administrative Settlement in 2009. The site has since been redeveloped with additional modified Land Use Restrictions (LURs) approved by DoR and a Brownfield Voluntary Agreement executed November 28, 2007. Site received a No Additional Action Letter dated October 3, 2016.

Town Loft Apartments files indicated the site contained one 2,000-gallon gasoline tank which was removed from the ground with soil and later groundwater contamination. Site closure letter issued on August 10, 2004, after site was monitored and wells were later abandoned. In addition, this site was entered and accepted into the Voluntary Oversite and Assistance Program (VOAP) in a letter dated January 3, 2018, from DoR.

Food City Gas N Go files indicate several active USTs installed in 2011 with no indication of a release.

Regions Bank files indicated four USTs were removed the property with contaminated soil being over excavated from the site. The site received a closure letter dated September 28, 1993. The site was later entered and accepted into the VOAP based on a letter dated May 9, 2019, after a Phase II ESA was conducted at the site indicating the bank location would be built over petroleum and chlorinated solvent impacted soils. A vapor barrier was designed and installed beneath the bank structure.

Kingsport Transit files indicate the site contained several USTs with some offsite impacts also presumed from an unknown upgradient source. Several wells were installed and sampled with groundwater contamination being identified. An unknown party entered the site into an agreement with TDEC and institutional controls in the form of an asphalt cap with periodic observations were put into effect.

Copies of the pertinent regulatory documents are included in Appendix III.

4.2 Additional Environmental Record Sources

4.2.1 EDR Supplementary Sources

The EDR report also includes additional environmental records not listed among the standard federal, state, and tribal databases, which are summarized as follows.

Table 4-4 – Additional EDR Proprietary Environmental Record Sources

Database	Approximate Search Distance	Number of Sites in Results
Manufactured Gas Plants	1 mile	0
EDR Historical Auto Stations	0.125 mile	3
EDR Historical Cleaners	0.125 mile	2

No manufactured gas plants, three historical auto stations, and two historical cleaners were identified within the respective search distances. Tobacco Road (EDR historic auto) located at 325 Clinchfield Street and was located by EDR as being 288 feet northwest (cross gradient) of the subject property however Tobacco Road was actually on the subject property in Building 6 and was never an auto station it sold tobacco products. EDR documents the auto station was in operation from 2003 to 2014 which is the years Tobacco Road was open. Hyatt Cleaners (EDR historic cleaners) located at 436 West Center Street is 501 feet south (upgradient) of the subject property and was in operation from 1973 to 2014. The site was noted as being verified as "not a generator" and/or has completed compliance evaluation inspections with no noted deficiencies. Kennedys Pat Auto Repair (historic auto) is located at 461 West Center Street and is included with the Regions Bank site noted in Table 4-3. Duffer-Taylor General Tire (historic auto) is located at 437 West Center Street and is also included with the Regions Bank site noted in Table 4-3. Clean-n-Save Quality Cleaners/Massey S Cleaners, Inc./Clean & Save (EDR historic cleaners) is located at 411 West Sullivan Street and is 637 feet east northeast (down gradient) of the subject property and was in operation as between 1991 and 2008 with no compliance issues noted. Clean & Save is noted as a RCRA NonGen / LNR for tetrachloroethylene with no violations found.

4.3 Physical Setting Sources

S&ME reviewed the United States Geological Survey (USGS) topographic map depicting the site and surrounding area. The map reviewed was the 2019 Kingsport 7.5-minute topographic map. The portion of the topographic map showing the site and immediately surrounding area is included in Appendix I (Figure 1).

4.3.1 *Aerial Photographs*

Aerial photographs of the subject property and surrounding properties were obtained from EDR. The photographs reviewed were dated 1956, 1976, 1983, 1988, 1992, 1997, 1999, 2007, 2010, 2014, and 2018. The 1956 aerial is very grainy and difficult to discern site features. The 1976 through 2018 aerials indicate the subject property has not changed and is similar in configuration as it is in present day. Copies of the historical aerial photographs are included in Appendix III.

4.3.2 Sanborn Maps

S&ME contracted with EDR to conduct a database search of Sanborn Fire Insurance Maps that depicted the subject property. Sanborn maps covering the subject property were available for review from the years 1916, 1919, 1925, 1930, 1949, and 1963 and are summarized below. A copy of the Sanborn review is included in Appendix III.

1916 and 1919 Sanborn Maps: do not show the subject property.

1925 Sanborn Map: Identifies the property as the Kingsport Hosiery Mills. It shows the northeast building (Building 1) as storage in basement, finishing on first floor, knitting on third floor with offices and a platform to the railroad track siding to the northwest. A gasoline tank is shown on the southeast corner of this building. A walkway is shown between the northeast and the southwest building (Building 2). The southwest building is noted as a dye house, boarding, and bleaching and then northwest end houses an apparent boiler. A reservoir is noted southwest of this building along with a 50,000-gallon gravity water tank about 100 feet high. A shed type building is noted northwest of the railroad siding.

1930 Sanborn Map: Building layout similar with a new walkway and a new building (Building 3) added onto the southeastern side of the southern building (Building 2) as part of the hosiery mill. A six-inch waterline is shown coming into and near the elevated water tower and into the buildings. Service reservoir is noted. Two boilers are noted in the northwest end of Building 2.

1949 Sanborn Map: Newest southeastern building (Building 3) is noted as a book warehouse with building layouts similar to the 1930 map. Building 2 is noted as hardware warehouse and book furniture. Building 1 is noted as hardware warehouse on the first floor and furniture warehouse on second and third floors. The water tower is not shown on this map, but the service reservoir is still noted. A pipe shed is noted as being located northwest of the railroad siding in a different position than the previously noted structure across the track siding. Boiler room noted on northwest end of Building 2.

<u>1963 Sanborn Map:</u> Two new book and paper warehouses Buildings 4 and 5, have been added to the southeastern sides of the Buildings 1 and 3. Building 6 has been added southwest of the northwest end of Building 2. The property is now Dobyns-Taylor Hardware and Warehouse storing hardware and furniture, books and paper. Service reservoir still exists.

4.3.3 *City Directories*

S&ME contracted with EDR to conduct a database search of city directories for the subject property and properties in the vicinity of the subject property. EDR reviewed city directories for the years 1989, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2020 for both Press Street and Clinchfield Street. The subject property listed as Paul Bellamy Furniture is noted as being at 445 Clinchfield Street instead of 435 Press Street on the 2000 listing. No other listings were noted for the subject property. Copies of the city directories are included in Appendix III.

4.3.4 Tribal Records

S&ME contracted with EDR to conduct a database search of environmental tribal records associated with the subject property. No environmental tribal records were identified.

4.3.5 Historical Topographic Maps

S&ME contracted EDR to conduct a search of available USGS historical topographic maps as a standard historical source to address five-year data gaps. The mapping typically identifies on-site structures and helps to establish general property use in the vicinity.

S&ME reviewed the 1894 Estillville 30-minute topographic map, and the 1935, 1939, 1959, 1968, 1978, 1991, 2013, 2016, and 2019 Kingsport 7.5-minute topographic maps. The 1894 map features were indiscernible. The 1935 and 1939 maps indicate the subject property contains a building configuration similar to today's configuration and the railroad track siding. The 1959 through 1991 maps indicate the property is within the urbanized area only illustrating the railroad track siding. The 2013 – 2019 maps are urbanized. Historical topographic maps are included in Appendix III.

4.4 Historical Use Information on the Property

S&ME reviewed aerial photographs from 1956 to 2018, city directories from 1989 to 2020, and topographic maps from 1894 to 2019 obtained from EDR for the subject property. The historical records indicate that the subject property was developed as farmland dating back to pre-1935 (topographic map) and the first building was constructed at the site pre-1988 (aerial photograph).

The historic property tax files, a standard historical source, were not reviewed. It is S&ME's opinion that these sources would not provide additional meaningful and complete information, or the sources were not considered to be practically reviewable or reasonably ascertainable.

4.5 Historical Use Information on Adjoining Properties

Historical information including aerial photographs, city directories, and topographic maps were reviewed to assess off-site historical land uses. Findings and observations are presented in the following tables.

Table 4-5 - Aerial Photograph Review of Adjacent Properties

Direction	Observed Feature	Years Observed for this Feature
Northeast	Road and commercial	1956 - 2014
Northeast	Residential	2018

5.0 Site Reconnaissance

5.1 Methodology and Limiting Conditions

A site reconnaissance of the subject property and surrounding area was performed by Ms. Carol Ford of S&ME on March 2, 2023, and was accompanied by Mr. Steven Bowers (Kingsport Economic Development). During the site visit, on-site observations were made followed by a vehicular survey of the surrounding area. The purpose of the site reconnaissance was to identify RECs at the subject property and identify sites of similar environmental concern located within the ASTM minimum search distances. S&ME personnel searched for evidence of past or present activities which could have led to the deposition of hazardous substances or petroleum products.

5.2 General Site Setting

5.2.1 *Current Use(s) of the Property*

The 3.1-acre subject property contains six interconnected buildings of approximately 111,000 total combined square feet used for rental property for furniture storage, warehouse supply storage, and a culinary business. Access to the subject property is off Press Street or Clinchfield Street.

5.2.2 Past Use(s) of the Property

According to observations noted during the site reconnaissance and interviews, the subject property was originally the Kingsport Hosiery Mill (1917) later operated as Dobyns-Taylor Hardware (1950's).

5.2.3 Current Use(s) of Adjoining and Surrounding Properties

The current uses of the adjoining properties were identified to the extent that they were visually observed from the subject property during our field reconnaissance or were identified in interviews or in the records review. Descriptions of adjoining properties are provided below:

- Northeast Press Street and Town Loft Apartments
- Southeast Vacant commercial buildings
- Southwest Burger King
- Northwest Clinchfield Street and Food City/retail/restaurants

5.2.4 Past Use(s) of Adjoining and Surrounding Properties

Evidence of past uses for adjoining and surrounding properties were not noted during the site reconnaissance other than an water tank labeled Kingsport Press.

5.2.5 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Bedrock outcrops were not observed on the subject property. Surface topography on the subject property slopes northeast towards unnamed tributary of Reedy Creek.

The subject property lies within the Appalachian Valley and Ridge Physiographic Province. The province is characterized by elongated, northeasterly-trending ridges formed on highly resistant sandstone and shale. Between ridges, broad valleys and rolling hills are formed primarily on less resistant limestone, dolomite, and shale.

Published geologic information indicates that the site is underlain primarily by bedrock of the Sevier Shale which consists of shale.

5.2.6 Descriptions of Structures and Roads

Six interconnected buildings with a total of 111,000 square feet are present on the site. Access if off Press or Clinchfield Streets.

5.2.7 Potable Water and Sewage Disposal System

Potable water and sewage disposal are provided to the subject property by the City of Kingsport, Tennessee.

5.3 Exterior Observations

The subject property contains six, interconnected buildings with a total of 111,000 square feet. The exterior of the facility is brick and concrete masonry unit (CMU) and includes a small asphalt parking area in front of Building 6 with mostly gravel around the rest of the building's perimeter, with the exception of a small tract of grass around the exterior reservoir located southwest of Building 2 which is enclosed with a fence. One small grass-covered area was present between the north end of walkway between Buildings 1 and 2 and one area south of the walkway which is surrounded by buildings and was layered with many layers of fabric to reduce weeds and tree growth (accessed only through basement window). A platform was present on the northwest end of Building 1 and a trailer, a stack of pallets and debris, and several loading docks were also present on the northwest/northeast sides of Building 1. No below grade drains were observed in the loading/unloading bays. Roof drains were observed discharging to the ground around the facility's exterior (most of them are broken). Once trash dumpster was noted northwest of Building 2 along with one exterior loading dock and a short wooden fence. Two dropouts were observed in the southeast corner of the building presumably from broken subsurface roof drainpipes. A concrete below-ground reservoir was present on the southwest side of Building 2. This area was fenced and the

total depth of the reservoir is estimated to be about 12 feet deep from top of concrete to bottom of reservoir. Seven pole-mounted transformers were present along Press and Clinchfield Street, with only two no polychlorinated biphenyls (PCB) labels visible. No staining was observed and the poles and transformers appeared to be of newer construction along Press Street.

5.4 Interior Observations

The facility is divided into six buildings as noted on Figure 3 in Appendix I.

Building 1: is a three-story building primarily consisting of wood floors and ceilings with a concrete floored basement. Floors one through three are used by Paul Bellamy Furniture to store furniture. Remnant restrooms from the hosiery mills days were observed along with a few offices, an old electrical unit, a freight elevator and elevator motor room and work bench where several cans of Otis cleaning compound were observed in a cabinet and stained concrete was observed beneath the elevator motor (2nd floor), fire suppression equipment on each floor with about two air compressors with the equipment/piping, and a small fourth-story penthouse area located midway down the northeast side of the building containing a shower, restroom, and a small open area. A breezeway connects Buildings 1 and 2.

The basement was primarily a concrete-floored area with two sump pumps on the southwest side of the building separated by a two-foot-tall CMU wall to divert water to the sumps, with one hose discharging to a floor drain and the other discharging out a window. The basement was partially flooded from recent rains with no visible signs of a sheen. Floor tile was observed at the entrance and a few side rooms immediately at the bottom of the staircase entering the basement area. Items generally observed in the basement include: several lawnmowers, several trailers, vehicles, a camper, a couple of metal 55-gallon drums (mostly empty), a couple 30-gallon drum (partially full), a few small gas containers, oils, lubricants, batteries, gallons of paint, furniture, and a locked area which was photographed by reaching around a side wall which contained numerous other odds n in items.

Building 2: is a one-story building primarily consisting of concrete floors on the northwest end of the building and wood floors on the southeast end. Salvage Warehouse stores numerous items for resale in the front half of the building (up to the walkway connector with Building 1). Numerous plastic 55-gallon drums for resale and/or storage of items were observed along with a wide variety of boxes and containers of resale items. A couple of five-gallon paint containers were observed in one corner of the northwest end of the building. The southeast end of the building is empty. A room with fire suppression equipment was observed and either a wet or stained area was observed north of the fire suppression room.

Concrete Ramp between Buildings 2 and 3: concrete floored ramp with two rooms to the northeast used for storage of miscellaneous items, a rototiller and a lawn mower, gasoline cans, and weed eater used for maintaining the aera inside the fenced in reservoir. No visible floor drains or staining was observed.

Building 3: is a high ceiling warehouse with wooden floors and brick walls used for furniture storage throughout. A large electrical panel was present on the northwest wall after entering from the walkway. No visible floor drains or staining were observed.

Buildings 4 and 5: are both CMU-walled warehouse structures with concrete floors, steel ceiling joints with gypsum ceiling panels. Both buildings are used for furniture storage. These areas show signs of water damaged

furniture and boxes with some water observed on the floor. Fire suppression equipment was observed in the southwest corner of Building 5. Building 4 had two office spaces near the loading/unloading ramps and a restroom. No visible floor drains or staining were observed.

Building 6: is a commercial culinary cooking business (Atlas Culinary) with cooking supplies/equipment, a bar area, assumed restrooms and a back porch. This business was only observed from the exterior windows but most of the inside was visible. Floors appear to be tile with a drop ceiling.

6.0 Interviews

6.1 Interviews with Past and Present Owners

Mr. George Taylor is the current owner of the subject property. Mr. Taylor indicated the building was registered on the National Register of Historic Places as the Kingsport Hosiery Mills in December 2020. Mr. Taylor provided historical information as it relates to the subject property (copies are included in Appendix IV). Mr. Taylor indicated the building was originally constructed in 1917 with two additions, one in 1930's and 1950's and the site was originally constructed as a hosiery mill and later converted to a hardware store by his father. Mr. Taylor has no knowledge of any previous environmental assessments, onsite wells, environmental liens, offsite fill, or buried waste on the subject property. Mr. Taylor indicated the back warehouse structures (Buildings 3, 4, and 5) once were used by Kingsport Press for light manufacturing and printing for the Kingsport Press newspaper. Mr. Taylor indicated there is a reservoir located on the property. Mr. Taylor indicated he has knowledge of the environmental issues related to Quebecor (Kingsport Press) across the street. Mr. Taylor indicated a pipe rack structure was present between the railroad spur and Clinchfield Street but that his family removed it along with the railroad spur. A copy of the Owner Questionnaire and interview is provided in Appendix IV. Mr. Taylor also provided photographs of the old hosiery mill and copies of those are included in Appendix IV.

6.2 Interview with Key Site Manager

The owner is considered the key site manager.

6.3 Interview with Occupants

There are no occupants in Buildings 1 through 5. The occupant in Building 6 was not available at the time of the site visit.

6.4 Interview with Local Government Officials

S&ME contacted the Kingsport Fire Department to inquire on the subject property. S&ME contacted Aly at Kingsport Fire Department and she reviewed the more current historical records for the subject property and indicated that back as far as 1997, no responses have been made to the subject property.

6.5 Interview with Others

No others were interviewed.

7.0 Vapor Encroachment Evaluation

Data obtained from the site reconnaissance and interviews were used in conjunction with the protocol established by ASTM E2600-15 to assess vapor encroachment on the subject property. Based upon regulatory records, site observations, and interviews, releases from off-site facilities are documented within an area of concern from the subject property consisting of 1/10 mile for petroleum releases or 1/3 mile for chemical releases. Based on the proximity of a non-petroleum release from Quebecor across Clinchfield Street from the subject property and Regions Bank petroleum release located upgradient of the subject property these factors indicate a vapor encroachment condition (VEC) does exist.

8.0 Findings

8.1 On-Site Findings

The following on-site findings were identified from the EDR database, state regulatory file documentation, and site reconnaissance activities:

- 1. Seven pole mounted transformers are present at the site.
- Several small commercial sized containers of gasoline and oil, etc. were observed in the basement of Building 1.
- 3. Several 30 and 50-gallon drums were observed in the basement of Building 1 and in Building 2, some empty and others partially full (contents unknown).
- **4.** Two air compressors are present in the facility associated with the fire suppression.
- 5. A gasoline tank was noted as being present on the southeast side of Building 1 on the 1925 Sanborn Map.

8.2 Off-Site Findings

Off-site facilities were listed within the ASTM minimum search distances. See Table 4-3 for details of off-site facilities requiring evaluation.

9.0 Opinions

9.1 On-Site Opinions

It is the opinion of the environmental professional who prepared this report that one on-site REC was identified: the gasoline tank identified on the 1925 Sanborn Map.

9.2 Off-Site Opinions

Two of the off-site facilities evaluated are considered a VEC and a CREC in connection with the subject property based upon their topographic location relative to the subject property, documented releases, regulatory status of documented releases, and/or distance from the subject property. See Table 4-3 for more information.

9.3 Data Gaps

A historical data gap was encountered during the performance of this assessment. Historical information was not available at five-year intervals back to 1940. Since other historical records were available, this data gap is not considered significant.

9.4 Additional Investigation

Based upon the findings and opinions of the Phase I ESA, additional investigation would be warranted on the subject property.

10.0 Conclusions

S&ME has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of the property located at 435 Press Street, Kingsport, Tennessee (tax parcel 046I A 024.00). Any exceptions to, or deletions from this practice are described in Section 11 of this report.

Based on the results of this Phase I ESA, S&ME identified no evidence of RECs, CRECs, or HRECs in connection with the subject property expect for the following: one gasoline tank identified on the 1925 Sanborn Map on the subject property (REC), Quebecor which is down gradient/cross gradient from the subject property (CREC), and Regions Bank (et. al.) which is upgradient from the subject property (CREC).

Based upon historical records, regulatory databases and records, and on-site observations, a Vapor Encroachment Condition from off-site sources does exist. This VEC determination is based upon proximity of a non-petroleum release from Quebecor property and Regions Bank property petroleum release located upgradient of the subject property.

11.0 Deviations

No deviations from the standard were made.

12.0 Additional Services

No additional services were performed for this Phase I ESA.

14.0 Signature(s) of Environmental Professional(s)

We, Carol Goldinger Ford and James R. Bruce, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in paragraph 312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Carol Goldinger Ford Senior Project Manager

Caul Soldin Fal

James R. Bruce, PG Senior Reviewer

15.0 Qualification(s) of Environmental Professional(s)

S&ME provides a broad range of environmental services, including site assessments for real estate transactions. S&ME has over 1,100 employees located in 34 offices throughout the southeast. Engineering News and Record recently ranked S&ME as one of the 150 largest environmental firms in the country.

The environmental professional for this Phase I ESA is Ms. Carol Goldinger Ford. Ms. Ford has 30 years of environmental experience performing and managing Phase I and II Environmental Site Assessments. Please refer to Ms. Ford's resume in Appendix VII for further details.

The senior reviewer for this project is Mr. James R. Bruce. Mr. Bruce has more than 34 years of experience in conducting environmental assessment activities. Please refer to Mr. Bruce's resume in Appendix VII for further details.

Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIFECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Copyright 2023 by Environmental Data Resources, LLC. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, LLC, or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). S&ME used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by S&ME. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal landfills and solid waste disposal facilities

A listing of reported complaints related to the Solid Waste Management division.

An online review and analysis by S&ME of the SWM COMPLAINTS list, as provided by EDR, has revealed that there are 2 SWM COMPLAINTS sites within approximately 0.5 miles of the target property.

VCP: The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted The program is open to everyone with an interest in addressing contamination at a site.

An online review and analysis by S&ME of the VCP list, as provided by EDR, has revealed that there are 10 VCP sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by S&ME of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

An online review and analysis by S&ME of the PFAS ECHO list, as provided by EDR, has revealed that there are 3 PFAS ECHO sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by S&ME of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by S&ME of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

program stan to track the nothication, permit, compliance, an

corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Address: 300 HILL ST
City State 7ip: KINGSPORT TN 37

City,State,Zip: KINGSPORT, TN 37660 Region: STATE

Facility Id: 1820116
Current Status: 8 Case Closed
Product Released: Not reported
Discovery Date: MAR-23-1993
How Discovered: 1 At Closure
Cause: 2 Overfill
Case Manager: Heather McDowell

Case Manager: Heather McDowell
Case Description: Not reported

Section: FO Priority: Low

Company Name: CEMEX, INC. (DIXIE CEMENT)
Owner Address: 6212 CEMENT PLANT RD

Owner City: KNOXVILLE
Owner State: TN
Owner Zip Code: 37914

Owner Telephone: (865) 541-5514
Owner Address 2: Not reported
fadd2: Not reported

Site Number:

Contact: Not reported Cac Contact: Not reported Contact Title: Not reported

Consultant Address 1: 312 Directors Drive
Consultant Address 2: Not reported

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal (Superfund) equivalent sites

SHWS: Promulgated Sites

"Inactive hazardous substance sites that constitute an imminent, substantial danger" is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. Such situations may include, but are not limited to one or more of the following: an immediate action is necessary to minimize an ongoing threat to the public health or pollution of the environment, an inactive hazardous substance site where there is an active release, where direct access to the hazardous substance is not controlled, or where incompatible hazardous substances are found in close proximity. Also known as Promulgated Sites List.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

USGS TOPOGRAPHIC MAP

Target Property Map: 13049632 KINGSPORT, TN

Version Date: 2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

KINGSPORT YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: HOLSTON

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information										
	Bou	ndary		Classif	fication	Saturated hydraulic				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec				
1	0 inches	5 inches	loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 4.5			
2	5 inches	22 inches	loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 4.5			
3	22 inches	61 inches	clay loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 4.5			

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Environment & Conservation

Telephone: 651-532-0052

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by S&ME were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

BROWNFIELD CONSENT ORDER & ADMINISTRATIVE SETTLEMENT

This Brownfield Consent Order & Administrative Settlement (hereinafter referred to as the "ORDER") is made and entered into by and between the Tennessee Department of Environment and Conservation (hereinafter referred to as "TDEC" or the "Department") and Quebecor World Kingsport, Inc., for the purpose of addressing the site described hereinbelow, which has the real or perceived threat of the presence on the site of environmental conditions, contaminants, hazardous substances, solid wastes, and/or other pollutants.

PARTIES

I.

James H. Fyke is the duly appointed Commissioner of the Department. Mike Apple has been delegated the authority to enter into Consent Orders.

II.

Quebecor World Kingsport, Inc. (hereinafter referred to as "Quebecor" or the "Consenting Party") is a corporation created and existing under the laws of the State of Tennessee. Quebecor seeks redevelopment of the Site for the benefit of the Kingsport community, but needs this Order to provide the protections necessary to attract parties to redevelopment of the Site.

JURISDICTION

III.

Pursuant to Tennessee Code Annotated § 68-212-224, the Commissioner is authorized to enter into a consent order with a party who is willing and able to conduct an investigation and remediation of a hazardous substance site or Brownfields Project.

This ORDER replaces and supersedes any and all prior orders of TDEC against the Consenting Party with respect to the Site, including without limitation that certain Commissioner's Order dated October 1, 1991.

IV.

For the purposes of this ORDER, a Brownfield project may be a site contaminated by hazardous substances, solid waste, or any other pollutant.

V.

The site subject to this ORDER is owned by Quebecor and is located at 335 Roller Street, Kingsport, Sullivan County, Tennessee 37660 (hereinafter referred to as the "Site"). The Site is approximately 20.621-acres in size. A legal description of the Site and a site map are attached hereto as Exhibit A. Quebecor has used the facilities for the manufacture of printed materials.

VI.

As required by T.C.A. § 68-212-224, the Consenting Party has submitted to the Department a summary description of all known existing environmental investigations, studies, reports or documents concerning the Site's environmental condition. A copy of this summary description is attached hereto as Exhibit B. As of the date of entering into this ORDER, the Site is not listed or been proposed for listing on the federal National Priorities List.

AGREED

A. FINANCIAL REQUIREMENTS

Ter	nnessee Code Annotate	d § 68-212-224 requi	res consideration	of a fee to en	roll in the
Voluntary	Cleanup Oversight and	Assistance Program.	The Commissione	er has determ	ined that a
fee of	dollars (\$) is appropriate for	the Site.		

B. IDENTIFICATION AND DOCUMENTATION OF CLEANUP

Based on the information submitted to the Department by or on behalf of the Consenting Party, and the Department's own review and investigation of the Site, the Parties hereto agree that this ORDER addresses the entire Site, and that the matters and substances of concern addressed herein include all those identified in the Summary and such other information, review and investigation, including without limitation the following:

In 1985, a leak was discovered in an underground transmission line connected to an aboveground storage tank at the facility. The storage tank, which was located in a diked area adjacent to the former ink lab contained lacquer thinner (a mixture of **acceptation to the lact the facility of the lost solvent** was and remains unknown, but at the time was estimated to be 2,000 to 4,000 gallons.

In response to the discovery, the company installed several monitoring wells in the area of the leak. In addition, an upgradient well was installed about 320 feet southeast of the leak site. Further, an environmental assessment plan was developed to examine subsurface conditions at the site and to delineate the horizontal and vertical extent of the contaminant migration.

In 1988, further investigative work was carried out by Lee Wan & Associates, Inc., and Terrock, Inc. The investigation included additional auger holes and monitoring wells. Thirty-three (33) soil samples and six ground water samples were collected for analyses. Based on this

phase of work, acctone, toluene, MEK and xylenes were detected in the soil samples. These constituents were found throughout the soil column in the vicinity of the historic leak, but concentrations generally increased in the sandy, gravely layer that occurred approximately 10 feet below the surface. The plume appears to have moved down through the sandy layer and into the perched water-bearing zone at the top of bedrock surface. The groundwater wells revealed a substantial amount of free product in all down gradient wells.

By 1992, Radian Corporation (formerly Lee Wan & Associates), reported that 10 monitoring wells had been installed on the property to assess soil and groundwater conditions near the leak site and of background locations up-gradient and down-gradient to the site. The contaminants continued to be acctone, tehuene, MEK, xylenes, benzene and ethyl benzene. Teetone, the most soluble of these, was documented to have formed an oval-shape plume of contamination measuring approximately 100 by 400 feet. The other contaminants were dispersed in a similar manner, but to a lesser extent. The Consenting Party was pumping the three monitoring wells closest to the release location to retrieve free product.

Soil contamination was determined to be the most severe in the vicinity of the leak site and extended throughout the soil column to the water table, which ranged from 8 to 12 feet below ground surface. The report indicated that low to moderate concentrations of acetone and MEK were found beneath the western edge of the Clinchfield Street adjacent to the leak site, although other contamination remained within the plant boundaries.

Between 1990 and 1994, a corrective action plan was prepared and implemented by Lee Wan & Associates, which analyzed several corrective action alternatives. By 1994, a two-phase vapor extraction technique was chosen.

In early 2001, a Courtyard Investigation Report identified contaminated soils and free product in three monitoring points in or near the courtyard area. Contaminants in excess of state clean up levels included between toluene, ethylbenzene, xylenes, acetone, methyl ethyl ketone at his opropanol:

In 2002, a remedial action work plan was submitted by Alliance which called for excavation of 1700 cubic yards of contaminated soil and installation of a biosparging/vapor recovery system in the courtyard on the site.

Since 1992, groundwater has been periodically monitored. Based on the most recent groundwater monitoring data, contaminants remain at levels consistent with previous sampling events. In addition to contaminants referred to above, with thioride has been detected at levels above the MCLs. Several metals, including without limitation lead, have been detected at levels above applicable regulatory limits. Based on visual turbidity in many of the samples, one sample was reanalyzed for dissolved metals. All parameters were determined to be less than regulatory limits with most being below detection limits. Confirmatory sampling was later conducted using low flow sampling conditions (designed to minimize turbidity) and all inorganic results were below detection limits with the exception of barium, which was well below the Federal MCL.

The parties refer to the reports (listed in the Summary attached hereto as <u>Exhibit B</u>) in their entirety for further information about the environmental conditions addressed by this ORDER.

C. AGREED LIABILITY RELIEF

Real or perceived hazardous substances, solid wastes or other pollutants are determined to be present on this site to an extent that may or may not have yet been fully characterized. The Consenting Party may occupy the status of a "liable party" pursuant to the definition of that term contained in T.C.A. §68-212-202(4). Liability may be apportioned pursuant to factors in T.C.A. §68-212-207 as well as other equitable factors. The Commissioner is authorized to determine an apportionment of liability within this ORDER as authorized by T.C.A. §68-212-224.

The Commissioner agrees that the response actions performed by the Consenting Party prior to the effective date of this ORDER, together with the implementation of the actions agreed upon in Section F will constitute satisfaction of Consenting Party's apportioned liability under all environmental statutes administered by the Department for the environmental conditions,

hazardous substances, contamination, solid wastes and/or other pollutants identified in Section B of this ORDER. The Consenting Party, however, remains potentially responsible for any release of hazardous substances, solid wastes or other pollutants that occurs at the Site after the effective date of this ORDER and while it owns the Site and/or conducts operations at the Site.

Other than the obligations set forth in this ORDER, the Consenting Party shall bear no liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. §9613(f)(3)(B), or under any statute administered by the Department, for investigation, remediation, monitoring and/or maintenance of the environmental conditions, hazardous substances, contamination, solid wastes, and/or other pollutants identified and addressed in this ORDER (1) during the implementation of the response actions required hereunder, as long as the Consenting Party is and remains in compliance with the terms and conditions of this ORDER, and/or (2) following the completion of such response actions required under this ORDER; provided, however, that to the extent that the Consenting Party has or maintains an interest in the Site, or possesses and/or controls all or a portion of the Site, its liability protections hereunder are contingent upon its continued adherence and enforcement of any land use restrictions imposed pursuant to or as a result of this ORDER. This ORDER also constitutes an administrative settlement for purposes of Section 113(f)(3)(B) of CERCLA, 42 U.S.C.§9613(f)(3)(B), pursuant to which the Consenting Party has, as of the effective date of this ORDER, resolved its liability to the State of Tennessee for the environmental conditions, hazardous substances, contamination, solid wastes and/or other pollutants identified in Section B of this ORDER. Notwithstanding the foregoing, nothing in this ORDER shall limit the liability or potential liability of the Consenting Party for contamination occurring after the effective date of this ORDER. This liability protection is extended to contractors conducting response actions at the Site, developers, tenants, and lenders, fiduciaries or insurers, conditioned upon performance of the obligations contained in this ORDER and compliance with any land use restrictions required thereby; provided, that such liability protection to other persons does not apply to liability to the extent that such liability arose prior to this Agreement.

D. THIRD PARTY LIABILITY RELIEF

The Consenting Party shall not be liable to third parties for contribution regarding matters addressed in this ORDER, provided that the third party was given actual or constructive notice of this ORDER, and the third party has been given an actual or constructive opportunity to comment upon this ORDER. The Consenting Party has demonstrated to the Department that constructive notice was accomplished by publishing a summary of this ORDER in the *Kingsport Times News* at least thirty (30) days prior to the effective date of this ORDER. Nothing in this ORDER shall impair the rights of third parties with respect to tort liability claims for damage to person or property arising from the contamination addressed by this ORDER.

E. LAND USE RESTRICTIONS

The Consenting Party agrees that as long as it owns the Site it will record or cause to be recorded any land use restrictions identified by the Department as necessary for the safe use of the property or any portion of the property in accordance with T.C.A. §68-212-225.

F. AGREED ACTIONS

- 1. The Consenting Party agrees to send notification of this ORDER by certified mail to all local governments having jurisdiction over any part of the Site and to all owners of adjoining properties. The Consenting Party shall provide the Department with adequate documentation to demonstrate that public notice has been accomplished.
- 2. The Consenting Party has provided to the Department all pertinent Site background information and results of any previous testing or investigations that may be in their possession relative to the Site required by Rule 1200-1-13-.09(2)(a)1.
- 3. The Consenting Party shall implement a risk-based analysis of the Site according to a mutually agreed upon schedule and in the format requested by the Department. Following receipt and evaluation of this information, the Department will schedule an assessment conference that the Respondent shall attend (the Department may elect to conduct this conference by telephone, in this case the Respondent is required to participate). The Respondent will be given at least seven (7) days notice prior to this conference. The purpose of this conference will be to

discuss existing data and determine any reasonable and necessary further investigation, remedial action, and/or long term monitoring and maintenance.

- 4. If at or following this conference the Department determines that additional investigation, remedial action and/or long term monitoring and maintenance is reasonable and necessary, the Respondent will submit, as the Department may direct, a plan(s) for performing the additional activities.
- 5. Upon approval by the Department, the Respondent shall implement these work plan(s) according to the schedule approved by the Department.
- 6. The Respondent shall submit to the Department a written report describing the performance and results of any additional work required pursuant to paragraph 4 above. Following receipt and evaluation of this report, the Department will schedule a conference, which the Respondent must attend (the Department may elect to conduct this conference by telephone, in this case the Respondent is required to participate). The purpose of this conference is to discuss the work performance and results and determine what, if any, additional work must be performed to ensure that the soil and groundwater contamination is effectively corrected. Again, the Respondent will be provided at least seven (7) days prior notice of such meeting.
- 7. The activities specified in paragraphs 4, 5, and 6 will be repeated until no longer deemed necessary by the Department.
- 8. After each submittal required of the Respondent pursuant to this Order, the Department will review that submittal to determine whether, in the opinion of the Department, it is adequate. If the Department determines that it is not adequate, the Department will, after consultation with the Respondent, either (i) require the Respondent to amend the submittal to correct deficiencies specified by the Department, or (ii) revise the submittal to correct the deficiencies.
- 9. Upon completion of all tasks set forth in this ORDER, the Department shall issue to the Consenting Party a letter stating the requirements of this ORDER have been fulfilled and

no further action is required of the Consenting Party concerning contamination identified and addressed in this ORDER. Upon the request of the Consenting Party, from time to time, the Department shall issue an interim status letter identifying what specific obligations remain to achieve completion of the work under this ORDER. Issuance of a no further action letter shall not relieve the Consenting Party of any responsibilities for operation and maintenance activities or continued adherence to and enforcement of land use restrictions, if any, pursuant to T.C.A. §68-212-225. The Department reserves the right to require additional action for contamination caused by the Consenting Party and occurring after the effective date of this ORDER or for contamination not identified and addressed under this ORDER, if any. The Consenting Party or successor in title to the Site shall be responsible for compliance with the requirements of this ORDER during the period in which such person owns an interest in the Site, or possesses and/or controls all or a portion of the Site.

G. ADDITIONAL REQUIREMENTS

- 1. The Consenting Party may request a time extension for any deadline included in this ORDER prior to the deadline. The time extension may be granted through mutual consent for good cause shown.
- 2. The Consenting Party agrees not to disturb, move or remove any areas of hazardous substances, solid waste or other pollutant(s) that are subject to liability protection under this ORDER without written approval by the Department unless the activities are being conducted under the terms and conditions of this ORDER, are necessitated by the normal day-to-day activities of any on-going business, or are being conducted pursuant to the work plan to be developed and implemented.

H. SITE ACCESS

During the effective period of this ORDER, and until certification by the Department of completion of all activities under this ORDER, the Consenting Party shall provide access to the Department and its representatives or designees during normal business hours to the Site to the

extent that Consenting Party has the power and authority to grant such access. Nothing herein shall limit or otherwise affect the Department's right of entry, pursuant to any applicable statute, regulation or permit. The Department and its representative shall comply with all reasonable health and safety plans published by the Consenting Party or its contractor and used by Site personnel for the purpose of protecting life and property.

I. SUBMISSION OF INFORMATION, REPORTS, OR STUDIES

Any information, reports, or studies submitted under the terms of this ORDER shall contain the following notarized statement:

I certify under penalty of law, including but not limited to penalties for perjury, that the information contained in this document and on any attachment is true, accurate and complete to the best of my knowledge, information and belief. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for intentional violation.

J. RESERVATION OF RIGHTS

- 1. This ORDER shall not be construed as waiving any right or authority available to the Commissioner to assess responsible parties other than the Consenting Party for liability for civil penalties or damages incurred by the State, including any natural resource damage claims which the Department or the State of Tennessee may have under Section 107 of CERCLA or any other statute, rule, regulation or common law.
- 2. Nothing in this ORDER shall be interpreted as limiting the Consenting Party's rights to preserve the confidentiality of attorney work product or client-attorney communication. T.C.A. §68-212-202, et seq. contains no provisions for confidentiality or proprietary information. Therefore, records, reports, test results, or other information submitted to the Department under this ORDER shall be subject to public review. Any and all records, reports, test results or other information relating to a hazardous substance site or the possible hazardous substance at the Site

submitted under this ORDER may be used by the Department for all purposes set forth in T.C.A. §68-212-201, et seq.

- 3. The Consenting Party may terminate this ORDER at any time upon written notice to the Department. Upon such termination, the Consenting Party shall have no further obligations hereunder other than payment of oversight costs accrued to the date of the notice of termination.
- 4. The Department may terminate this ORDER by written notice to the Consenting Party in the event that the Department receives timely comments from third-party contribution claim holders pursuant to the notice sent under Section D of this ORDER, if any, and such comments disclose facts or considerations that indicate that this ORDER is inappropriate, improper or inadequate; provided, however, absent fraud or intentional misconduct, that in such event the Consenting Party may elect to waive the protections set forth in Section D hereunder and the remainder of the terms and conditions of this ORDER shall continue to be in full force and effect. The Department's notice of termination must be made within thirty (30) days of the end of the 30-day notice period required by Section D. The Consenting Party's waiver notice must be made within fifteen (15) days after receipt of the Department's termination notice.
- 5. If any provision of this Order is held to be invalid or unenforceable by a court of competent jurisdiction, then the remaining provisions of this Order will nevertheless remain in full force and effect.

The individual signing below on behalf of the Consenting Party represents that he or she is the duly authorized agent, capable of entering into a binding ORDER on behalf of the Consenting Party he or she executes this ORDER on behalf of.

The Effective Date of this ORDER is the thirtieth (30th) day after the publication of the notice described in Section D of this ORDER.

[Site Description]

TRACT 1 (PARCELS 1, 2, 3 & 5)

BEGINNING on a drill hole in a concrete walk at the intersection of the Westerly line of Clinchfield Street with the Northeasterly line of West Center Street; thence with said line of West Center Street N 51° 58' 00" W, a distance of 942.23 feet to an iron pin at the intersection with the Southeasterly line of Roller Street; thence with same N 38° 02' 00" E, a distance of 790.41 feet to an iron pin at the common corner for Lots 3 & 4, Block 34; thence with the divisional line of said lots S 51° 58' 00" E, a distance of 125.00 feet to an iron pin corner for said lots; thence with the Southeasterly lines of Lots 4 through 11 & an unnumbered parcel N 38° 02' 00" E, a distance of 400.91 feet to a drill hole in the Southwesterly line of an alley; thence with same S 37° 12' 54" E, a distance of 334.90 feet to a drill hole in the Westerly line of Clinchfield Street; thence with same three calls as follows: S 24° 10′ 31" W, a distance of 142.94 feet to the point of curvature of a tangent curve, concave to the East, having a radius of 1462.70 feet, a central angle of 13° 47' 30", a chord bearing of S 17° 16' 46" W, a chord distance of 351.24 feet; thence Southerly along said curve, an arc distance of 352.09 feet to at the point of tangency; thence S 10° 23' 01" W, a distance of 721.18 feet to the POINT OF BEGINNING; and being all of Block 33, Lots 1, 2 & 3 and an unnumbered parcel of Block 34, and also a vacated portion of Press Street, Kingsport, Tennessee, containing 16.315 acres more or less.

TRACT 1 (PARCEL 4)

BEGINNING on a drill hole in a concrete walk at the intersection of the Southwesterly line of West Sullivan Street with the Westerly line of Clinchfield Street, a corner for Lot 21; thence with said line of Clinchfield Street S 24° 10′ 31″ W, a distance of 165.23 feet to a drill hole, a corner for Lot 21 in the Northeasterly line of an alley; thence with same, and the lines of Lots 21 through 16 N 37° 12′ 54″ W, a distance of 384.93 feet to an iron pin at the common corner for Lots 16 & 15; thence with the divisional line of said lots N 52° 47′ 06″ E, a distance of 145.06 feet to an iron pin corner for said lots in the Southwesterly line of West Sullivan Street; thence with same and the lines of Lots 16 through 21 S 37° 12′ 54″ E, a distance of 305.81 feet to the POINT OF BEGINNING; and being Lots 16 through 21, Block 34, Kingsport, Tennessee, containing 1.150 acres, more or less.

BEING PART of the same property conveyed to Kingsport Press, Inc., by deeds of record in Book 330, page 230, and Book 337, page 550, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Kingsport Press, Inc. filed with the Secretary of State of California on October 10, 1985, the name of Kingsport Press, Inc. was changed to Arcata Graphics Kingsport of record in Book 1034C, page 311, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Arcata Graphics Kingsport filed with the Secretary of State of California on August 4, 1994, the name of Arcata Graphics Kingsport was changed to Quebecor Printing Kingsport Inc. of record in Book 1034C, page 302, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Quebecor Printing Kingsport, Inc., filed with the Secretary of State of California on September 1, 2000, the name of Quebecor Printing Kingsport, Inc. was changed to Quebecor World Kingsport Inc., of record in Book 1834C, page 404, Register's Office for Sullivan County, Tennessee.

TRACT 2

BEGINNING on an iron pin at the intersection of the Southwesterly line of Arch Street with the Northwesterly line of Roller Street, a corner for Lot 31, Block 38; thence with said line of Roller Street and the lines of Lots 31, 30 & 29 S 38° 02' 00" W, a distance of 158.00 feet to an iron pin corner to lot 28; thence with the line common to Lots 28 & 29 N 51° 58' 00" W, a distance of 150.00 feet to an iron pin in the line of Lot 25; thence with same N 38° 02' 00" E, a distance of 50.00 feet to an iron pipe at the common corner for Lots 16, 25, 29 & 30; thence with the lines of Lots 16 & 17 and Lots 25 & 24 N 51° 58' 00" W, a distance of 120.00 feet to an iron pin at a common corner for Lots 17, 18, 23 & 24; thence with the line for Lots 17 & 18 N 38° 02' 00" E, a distance of 108.00 feet to a drill hole in a concrete walk in the Southwesterly line of Arch Street; thence with same and the lines of lots 17, 16 & 31 S 51° 58' 00" E, a distance of 270.00 feet to the POINT OF BEGINNING; and being Lots 16, 17, 29, 30 & 31, Block 38, containing 0.842 acre, more or less.

BEING PART of the same property conveyed to Kingsport Press, Inc., by deeds of record in Book 330, page 230, Book, 396, page 219, Book 394, page 432, Book 330, page 34, and Book 330, page 469, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Kingsport Press, Inc. filed with the Secretary of State of California on October 10, 1985, the name of Kingsport Press, Inc. was changed to Arcata Graphics Kingsport of record in Book 1034C, page 311, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Arcata Graphics Kingsport filed with the Secretary of State of California on August 4, 1994, the name of Arcata Graphics Kingsport was changed to Quebecor Printing Kingsport Inc. of record in Book 1034C, page 302, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Quebecor Printing Kingsport, Inc., filed with the Secretary of State of California on September 1, 2000, the name of Quebecor Printing Kingsport, Inc. was changed to Quebecor World Kingsport Inc., of record in Book 1834C, page 404, Register's Office for Sullivan County, Tennessee.

TRACT 3

BEGINNING on an iron pipe at the intersection of the Southwesterly line of Arch Street with the Northwesterly line of Roller Street, a corner for Lot 27, Block 38; thence with said line of Roller Street and the lines of Lots 27 & 26, Block 38, then with the lines of Lots 22 & 21, Block 37, then crossing a vacated alley S 38° 02' 00" W, a distance of 213.41 feet to an iron pin in the Northeasterly line of said alley; thence with same and the lines of Lots 1 through part of 6, Block 37 N 51° 58' 00" W, a distance of 139.68 feet to the point of curvature of a tangent curve, concave to the Southwest, having a radius of 886.20 feet, a central angle of 4° 34′ 13″, a chord bearing of N 54° 15' 07" W, a chord distance of 70.67 feet; thence Northwesterly along said curve, and the lines of part of Lot 6 through Lot 8, an arc distance of 70.69 feet to an iron pin in the line of Lot 9, Block 37; thence with the line of Lot 9 and crossing a vacated alley N 33° 27' 47" E, a distance of 78.48 feet to an iron pin in the Southwesterly line of another vacated alley; thence with same and with the lines of Lots 9 through 14, Block 37 N 51° 58' 00" W, a distance of 197.71 feet to an iron pin corner for Lot 15; thence crossing said alley N 39° 19' 00" E, a distance of 25.01 feet to an iron pin, a corner for Lots 4 & 5, Block 38 and in the Northeasterly line of said alley; thence with same and the lines of Lots 4, 3 & 2 S 51° 58' 00" E, a distance of 183.70 feet to an iron pipe corner for Lots 2 & 1, Block 38; thence with the line of said lots N 38° 02' 00" E, a distance of 113.00 feet to an iron pipe in the Southwesterly line of Arch Street; thence with same and the line of lot 1, then crossing another vacated alley, then the line of Lot 27 S 51° 58' 00" E, a distance of 230.00 feet to the POINT OF BEGINNING; and being Lots 21, 22 and an unnumbered parcel, Block 37, Lots 1, 26 & 27, Block 38, and three vacated alleys in Blocks 37 & 38, Kingsport, Tennessee, containing 1.205 acres, more or less.

BEING PART of the same property conveyed to Kingsport Press, Inc., by deed of record in Book 330, page 230, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Kingsport Press, Inc. filed with the Secretary of State of California on October 10, 1985, the name of Kingsport Press, Inc. was changed to Arcata Graphics Kingsport of record in Book 1034C, page 311, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Arcata Graphics Kingsport filed with the Secretary of State of California on August 4, 1994, the name of Arcata Graphics Kingsport was changed to Quebecor Printing Kingsport Inc. of record in Book 1034C, page 302, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Quebecor Printing Kingsport, Inc., filed with the Secretary of State of California on September 1, 2000, the name of Quebecor Printing Kingsport, Inc. was changed to Quebecor World Kingsport Inc., of record in Book 1834C, page 404, Register's Office for Sullivan County, Tennessee.

TRACT 4

BEGINNING on an iron pin in the Easterly line of Clinchfield Street, said iron pin being located S 10° 23' 01" W, a distance of 284.04 feet along said line from the intersection of said line with the Southwesterly line of Press Street; thence by a line common with Dobyns Taylor Hardware S 51° 58' 00" E, a distance of 364.49 feet to an iron pin corner with Lot 39; thence with the line of Lot 39 S 38° 02' 00" W, a distance of 148.40 feet to an iron pin in the Northeasterly line of an alley; thence with same N 51° 58' 00" W, a distance of 286.74 feet to an iron pin in the Easterly line of Clinchfield Street; thence with same N 10° 23' 01" E, a distance of 167.53 feet to the POINT OF BEGINNING; and being a part of Block 27, Kingsport, Tennessee, containing 1.109 acres, more or less.

BEING PART of the same property conveyed to Kingsport Press, Inc., by deed of record in Book 330, page 230, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Kingsport Press, Inc. filed with the Secretary of State of California on October 10, 1985, the name of Kingsport Press, Inc. was changed to Arcata Graphics Kingsport of record in Book 1034C, page 311, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Arcata Graphics Kingsport filed with the Secretary of State of California on August 4, 1994, the name of Arcata Graphics Kingsport was changed to Quebecor Printing Kingsport Inc. of record in Book 1034C, page 302, Register's Office for Sullivan County, Tennessee.

BY Certificate of Amendment of Articles of Incorporation of Quebecor Printing Kingsport, Inc., filed with the Secretary of State of California on September 1, 2000, the name of Quebecor Printing Kingsport, Inc. was changed to Quebecor World Kingsport Inc., of record in Book 1834C, page 404, Register's Office for Sullivan County, Tennessee.

The foregoing legal descriptions were derived from a survey dated April 25, 2007, prepared by Joseph D. Connelly (RLS Tennessee License Number 836) of Connelly Land Surveying, 1561 Fuller Street, Kingsport, Tennessee 37664.

EXHIBIT B

SUMMARY OF TECHNICAL REPORTS FOR QUEBECOR WORLD PROPERTY IN KINGSPORT, TENNESSEE

The following summary is a listing of technical reports for environmental investigations and assessments for the Quebecor World's Roller Street site in Kingsport, Tennessee. Consenting Party is unaware of the existence of any reports not listed below. This summary is intended to fulfill the statutory disclosure requirements associated with the Brownfield Order application process. All reports listed below are on file at the Tennessee Department of Environment and Conservation ("TDEC").

Document Title	Date	Entity	Description
Subsurface Investigation	11/19/1986	Barge,	Water samples collected 2x per
Report		Waggoner,	week;COD (chemical oxygen demand),
		Sumner and	And the second of the second o
		Cannon	teluene xylene isopropanol. Samples
			show varying degrees of contamination
			with well 1 and well 2 shown to be the
			most concentrated. Well 3 shows occassional concentrations at detection
			limits, most likely due to sampling
			technique (i.e. cross contamination).
Environmental	1/11/1988	Lee Wan &	Plan for additional site investigation -
Assessment Plan	1,11,1500	Associates	installation of two additional monitoring
			wells and 8 soil borings; objective of
			plan is to collect information to compile
			an assessment report; documents
			contaminates of concern (COC) as
		`	accione, toruche, MEK, xylene
Environmental	6/8/1988	Lee Wan &	draft dated 4/15/88; discusses results of
Assessment Report		Associates	thirty-three soil samples and six
			groundwater samples collected; showed
			increased concentrations of contaminates
			in the sandy, gravelly layer around 10 feet deep; water samples from all three
			down-gradient wells contained a
			substantial amount of free product;
			material transport appears to be toward
			the west or northwest

Environmental	3/2/1989	Lee Wan &	Cites Environmental Assessment Plans
Assessment Report		Associates	Jan 11,1988, November 11, 1988; as well as Environmental Assessment Reports May 21,1988 and June 8, 1988; proposes 3 additional monitoring wells, 2 additional auger holes to better define the contamination plume; 3 monitoring wells were installed and 2 auger holes were completed but the conclusion was that the plume was still not adequately defined.
Quarterly & Semi-	1990 to	Radian,	reports of sampling and analysis of
Annual GW Monitoring	present	ERA&A	groundwater
Reports			
Environmental	8/31/1990	Lee Wan &	In EAC SW files;Based on work done
Assessment Report		Associates	pursuant to all the environmental
			assessment plans done to date, see
			attached document; recommendes full
			scale corective measures be installed and
			a corrective measures study be
			undertaken in order to select proper remediation alternatives
Corrective Action Plan	10/1/1990	Lee Wan &	sections on baseline risk assessment and
Corrective Action I lan	10/1/1990	Associates	corrective action objectives were not
		7 ASSOCIATES	included by agreement with the TDEC,
			pending further consideration (as
		į	detailed in commissioners order);
			screened corrective action alternatives
			with groundwater extraction and surface
			treatment selected as most suitable for
			water; proposes extraction well boring;
			no specific method for soil remediation
			was proposed
Facility Investigation Report	February 1992	RADIAN	also identifies buttle comes benzene and ethylbenzene as COC
Baseline Risk	December	RADIAN	In EAC SW files; establishes target
Assessment	1992		concentrations of compounds which are
			higher than regulatory levels but
			contends they are appropriate given
			actual site conditions
Groundwater Monitoring	December	RADIAN	Monitoring Plan for MW-1,(first sample
Program Plan for	1992		round only), MW-2, MW-5, MW-
Arcata/Kingsport			6,MW-7 and MW-8; MW-3 and 4 to be
			used for free product abatement,
			discontinues free porduct recovery in
	L	1	

Addendum to the Arcata Graphics/Kingsport Facility Investigation Report Addendum to the Arcata	June 1993	RADIAN	MW-2; establishes MW-8 as signal well for contaminate migration as it is currently clean; incorporates MW-9 and 10 into the regime in the event MW-8 shows signs of contamination; requires semi-annual monitoring Monitoring well 11,12,13 installation Monitoring well 14,15 installation
Graphics/Kingsport Facility Investigation Report			
Alternate Concentration Limit Determination	1/1/1994		This was a part of the January 1994 Corrective Action Plan. As of January 2002 and as noted on page 5 of Remedial Action Work Plan of same date, ACL's are no longer recognized by TDEC
Bioremediation Treatability Study	January 1994	ERA&A	The object of the treatability study was to determine whether a viable and acclimated indigenous microbial population exists in the contaminated soils at the site, the nutrient needs of the microbial population, and what factors must be amended to provide successful in situ bioremediation. Given an adequate supply of oxygen and nutrients, a recirculating in situ biological treatment system with nutrient and oxygen addition at the surface, and with granular activated carbon (GAC) and/or air stripping to polish the groundwater to drinking water standards before reinjection, would be a viable treatment system for the contaminated groundwater at the site. Similarly, a soil vapor extraction system operated in conjunction with in situ bioremediation would successfully remediate unsaturated soils at the site.

Corrective Action Plan	January 1994	RADIAN	The ICAP and CAP, as well as the Commissioner's Order lead to the phased corrective action. This includes a two-phase approach – 1) the installation of the groundwater dual phase extraction system (DPES) installed in January 1996, and 2) the use of chemical oxidation in 1999 to polish off remaining contaminant. Steam injection was also utilized to facilitate the contaminant removal.
Courtyard Investigation Report	1/1/2001	Alliance Remediation Services	Detailed description of soils in courtyard area; presents and interprets then-current soil and GW analytical data; results indicated contaminated soils present throughout the courtyard; reports measurable accumulations of free product detected at three monitoring points and a sheen of free product detectied at five other monitoring points. Dissolved-phase concentrations of behavior, toluene, ethyloenzene, xylenes, acetone, MEK, and isopropanol in excess of state reg clean up levels were present in courtyard monitoring wells
Remedial Action Work Plan	1/21/2002	Alliance	Calls for excavating approx. 1700 cubic yards of contaminated soil, installation of a biosparging/vapor recovery system in courtyard to treat residual dissolved phase contamination remaining after the excavation and allowing natural attentuation of plume under Building 32; Calls for a groundwater classification after approximately two years of groundwater treatment and application by Quebecor to a "site-specific impaired status" and if approved, move into the "monitoring only" program.
Quarterly & Semi- Annual GW Monitoring Reports	12/04 to present	ERA&A	reports of sampling and analysis of groundwater (ERA&A reports issued 02/05, 08/05, 02/06, 07/06, 01/07, 08/07)
Phase I ESA	November 2006	ERA&A	Environmental Site Assessment prepared on the property at the request of Quebecor

Asbestos Survey Report	May 3, 207	ERA&A	Asbestos containing materials were identified in the building. Most of that material was in good condition with the exception of the pipe and boiler insulation which are damaged. The damaged material should be repaired.
Comprehensive Groundwater Monitoring Report	June 2007	ERA&A	Report documents the results of the February 21 and 22, 2007 comprehensive groundwater monitoring activities and the May 2007 confirmation sampling. all of the 16 onsite monitoring wells were sampled for the full Appendix II list of compounds. Analytical results were consistent with previous events

Lana Petway - Quebecor Area Project

From:

"Thompson, Michael" < Thompson@ci.kingsport.tn.us>

To:

"Dana Petway" < Dana. Petway@tn.gov>

Date: Subject: 9/3/2009 12:36 PM Quebecor Area Project

Attachments: 2009-C10.pdf

Dana,

I was able to get the plan set in one email. The title sheet shows the intersection we are working on which is the southeast corner of the Quebecor site. The fourth sheet (C3) shows the proposed work. Basically we are widening the roadway by one lane and will therefore be removing the existing sidewalk widening the road and placing a new sidewalk 12' into the site. There is a little deeper impact right at the corner where we are putting in a slip lane and radius. I will work on the H&S plan and get back with you.

Thank you, Michael

PROJECT SPECIFIC HEALTH AND SAFETY PLAN FOR CENTER STREET / CLINCHFIELD STREET INTERSECTION IMPROVEMENTS KINGSPORT, TENNESSEE

Prepared by:
Michael N. Thompson, P.E.
Assistant Public Works Director
City of Kingsport, TN

September 4, 2009

Project Information

· , 🚅 🗡 ,

The purpose of this project specific Health and Safety Plan (HASP) is to relay safety precautions such that work is performed in a safe manner. This HASP describes known site conditions as they may affect worker health and safety and identifies health and safety requirements including the use of personal protective equipment (PPE) that may be required.

Site Description

The subject project is an upgrade to the existing signalized intersection of Center Street and Clinchfield Street in downtown Kingsport, TN. Modifications to the intersection include the widening of Clinchfield Street by approximately 12' towards and onto the Quebecor Site. Previous environmental sampling on the Quebecor Site indicated the soil and groundwater had contamination above regulatory limits. In addition, a Brownfield Agreement has been negotiated for the redevelopment of the property.

Description of Work

All work performed under this project will be at the southeast corner of the subject property. The work on the subject property includes the excavation of the existing concrete sidewalk and concrete and asphalt paving. Once excavation has taken place, the subject property will be capped with either asphalt roadway or concrete sidewalk.

Chemical Hazards

Potential chemical hazards are associated with MEK (methyl –ethyl ketone), acetone, toluene, xylenes, benzene, ethyl benzene, isopropanol, butyl acetate and vinyl chloride constituents in the soil at this site. Potential routes of exposure include ingestion, inhalation and absorption. Dust suppression (i.e. wetting techniques) will be utilized during excavation to minimize dust generation at the site.

Inhalation – Dust filter masks will be worn if dust suppression is determined to be inadequate to protect workers.

Absorption – Workers will wear disposable gloves to prevent absorption of materials when performing activities that will require contact with the soil.

Ingestion – Workers will wash hands prior to eating, drinking, smoking, etc. to prevent ingesting contaminants in the soil. Workers will not ingest the soil nor drink any ground water at the site.

CERTIFICATION OF SITE PERSONNEL

By signing below, I certify that I have read this Health & Safety Plan and am familiar with its provisions and my own proposed activities and responsibilities on site.

Kingsport, Sullivan County, Tennessee

Site ID# SRS-0081

Subject: Letter of No Additional Action

Dear Mr. Robbins:

The Division of Remediation has reviewed the 2015 Vapor Monitoring Results and previous action plans for the site. Based upon the land use restrictions, sampling results, and subsequent action plans, the Division will require no additional action at this time, unless new information is discovered substantially changing the facts as we know them today. The land use restrictions will remain in place to ensure that the site remains protective of human health, welfare, and the environment.

For questions or additional information, please contact Tim Stewart at tim.stewart@tn.gov or 615-741-4998.

Sincerely,

Tim Stewart

RE: Closure of UST System
Duffer Taylor Service Station
Facility ID #1-820118

Dear Mr. Witt:

On August 6, 1993, Mr. Vic Davis of Vic Davis Construction, Inc. informed me via the telephone that all soil which was excavated during the closure of the UST system at 437 West Center Street was disposed of at BFI (Carter County Landfill). Based on the information provided the Division, the petroleum UST systems (5 tanks) can be considered closed. No further investigation is required at this time. However, the Division may require additional action should a problem become apparent in the future.

Please be advised that the removed tanks shall be stored properly in accordance with all applicable laws and regulations.

Rule 1200-1-15-.02(3)(a) requires owners/operators to notify the Division of any changes (removal, change-in-service, new installation, etc.) made in the UST system.

If an amended notification form has not been submitted, complete the enclosed form and mail to:

VOLUNTARY PROGRAM FEE SCHEDULE

Tennessee Code Annotated § 68-212-224 requires consideration of a fee to enroll in the Voluntary Program. This payment must accompany this application when it is signed on behalf of the Voluntary Party and returned to the Department. The Commissioner has set the following schedule of fees that apply to all sites working in cooperation with the Department to recover the expense of oversight. These fees are in place of hourly time charges and normal travel costs during the first 150 hours of oversight for the project.

Program Entry	\$ 750
Site Characterization	\$ 2,000
Remediation/ Corrective Action	\$ 2,500
Risk Assessment Review	\$ 2,000
Vapor Intrusion Evaluation	\$ 2,000
Land Use Restrictions	\$ 500
Brownfield Voluntary Agreement	\$ 3,000

In addition to the fees identified previously, an annual longevity fee of \$3,000 will be charged to the Site on the anniversary of the date the site was accepted into the Voluntary Program until a letter requiring no further action has been issued or the agreement has been terminated.

Upon reaching 150 hours of oversight, the Voluntary Party will be charged the current hourly rate (e.g. seventy-five dollars (\$75.00) per hour for FY 2015-2016) for oversight in addition to the fee schedule listed above. This amount includes the current hourly rate and pro rata portion of benefits for the Department's employees actively employed in oversight of work, including preparation for and attendance at meetings, mileage, and the current State overhead rate. Additionally, any out-of-pocket expense, mileage, lab expense and costs including the State's current overhead rate, costs billed by State contractor(s) who are actively performing oversight or other unusual costs to the Department shall be billed to and paid by the Voluntary Party.

Fees must be paid in order to remain in the Voluntary Program and to receive a letter of completion.

VOLUNTARY PROGRAM CONTACT INFORMATION

If you have any questions or need further information, please contact the Voluntary Program Manager at the above address or by calling (615) 532-0919.

Owner Questionnaire

SITE: 435 Press Street (Dobyns Taylor Hardware S&ME Project No: 23400004

	ease answer the following questions to the best of your knowledge. Provide an explanation for any es" responses (attach additional pages/information if needed).
	Are you aware of past industrial or manufacturing uses/activities on the subject property? YES _X_ NO Mr. Taylor provided a historical account of the former Kingsport Hosiery Mill as well as his family's use as a hardware store and warehouse storage for Kingsport Press across the street in the form of paper and book storage. What were previous uses of the subject property and adjacent properties, if known?
3.	Hosiery Mill, warehouse, light manufacturing consisting of printing used by Kingsport Press. Are you aware of the current or past presence of underground or aboveground fuel/chemical storage tanks on the subject property? YES NO _X Not during his family's ownership since around 1945.
4.	Are you aware of the current or past presence of surface or buried waste on the subject property? YES NO _X_
5.	Has any portion of the subject property ever been used as a filling station, dry cleaner, auto repair shop, junkyard, or a waste treatment, storage, disposal, processing, or recycling facility? YES NO _X
6.	Has fill material (dirt/rock) from offsite sources been placed on the subject property? YES NO _X
	Are you aware of the previous existence of pits, ponds, or lagoons on the subject property? YES _X NO Service reservoir on southwest side of building which is still in existence. Are you aware of environmental liens or Activity and Use Limitations (AULs) associated with the subject property? YES NO _X
9.	Are you aware of environmental problems associated with the subject property? YES NO _X
10.	Are you aware of environmental problems associated with properties adjacent to the subject property? YES _X NO Environmental issues associated with the property across the street – Kingsport Press
11.	Do you have knowledge of wells (monitoring, drinking, irrigation) ever being located on the subject property? YES NO _X
12.	When was the existing building(s) constructed, if present, and what is the use(s)? First two buildings built in 1917, with additions in the 1930's and again under his family's ownership in the 1950's two buildings were added.
13.	When were prior buildings demolished, if any, and what were they used for? The pipe rack towards Clinchfield Street and the railroad track siding were removed by his family, all other buildings intact.
14.	Have previous environmental assessments been completed for the subject property? If "yes" please provide copies for our review. YES NO _X
15.	Who are current tenants? Atlas Culinary in small southwestern building, Salvage Warehouse, to the north of Atlas Culinary, and Paul Bellamy Furniture uses the three stories of the taller building as well as most of the remaining buildings for furniture storage.

Completed By: Carol G. Ford on behalf of in-person interview with Mr. George Taylor owner who is legally blind on 2-21-23.

16. Who were former tenants? Kingsport Hosiery Mills and Dobyns Taylor Hardware and Warehouse

THE TENNESSEE HISTORICAL COMMISSION

This is to certify that

Kingsport Hosiery Mills

has been entered in

THE NATIONAL REGISTER OF HISTORIC PLACES

by the

United States Department of the Interior upon nomination by the State Historic Preservation Officer under provisions of the National Historic Preservation Act of 1966 (P.L. 89-665).

The National Register is a list of properties "significant in American history, architecture, archaeology, and culture – a comprehensive index of the significant physical evidences of our national patrimony." Properties listed thereon deserve to be preserved by their owners as a part of the cultural heritage of our nation.

E. Patrick McIntyre, Jr.

State Historic Preservation Officer

E Patril Monty Dr.

December 8, 2020

Date

RESULTS OF LISTING IN THE NATIONAL AND TENNESSEE REGISTERS OF HISTORIC PLACES

A property's listing in the National Register automatically results in its listing in the Tennessee Register. Listing in these registers provides recognition of a property's historic significance. It does not restrict property owners in any way. Below are some benefits for owners of properties listed in the National and Tennessee Registers of Historic Places.

Eligibility for Federal tax provisions.

If a property is listed in the National Register, certain Federal tax provisions may apply. The Tax Reform Act of 1986 revises the historic preservation tax incentives authorized by Congress in the Tax Reform Act of 1976, the Revenue Act of 1978, the Tax Treatment Extension Act of 1980, the Economic Recovery Tax Act of 1981, and the Tax Reform Act of 1984, and as of January 1, 1987, provides for a 20 percent Investment Tax Credit (ITC) with a full adjustment to basis for rehabilitating historic commercial, industrial, and rental residential buildings. The former 15 percent and 20 percent Investment Tax Credit (ITCs) for rehabilitations of older commercial buildings are combined into a single 10 percent ITC for commercial or industrial buildings built before 1936. The Tax Treatment Extension Act of 1980 provides Federal tax deductions for charitable contributions for conservation purposes of partial interests in historically important land areas or structures. Whether these provisions are advantageous to a property owner is dependent upon the particular circumstances of the property and the owner. Because tax aspects outlined above are complex, individuals should consult legal counsel or the appropriate local Internal Revenue Service office for assistance in determining the tax consequences of the above provisions. For further information on certification requirements, please refer to 36 CFR 67.

Consideration in the planning for Federal, federally licensed, and federally assisted projects.

Section 106 of the National Historic Preservation Act of 1966 requires that Federal agencies allow for the Advisory Council on Historic Preservation to have an opportunity to comment on all projects affecting historic properties listed in the National Register. For further information, please refer to 36 CFR 800.

Consideration in the issuing of a surface coal mining permit.

In accordance with the Surface Mining and Control Act of 1977, there must be consideration of historic values in the decision to issue a surface coal mining permit where coal is located. For further information, please refer to 30 CFR 700 et seq..

Qualification for Federal grants for historic preservation when funds are available.

JUNE 7, 2017

Dobyns-Taylor Hardware 1216 Watauga Street Kingsport, TN 37660

The City of Kingsport would like to take this opportunity to recognize the Dobys-Taylor Warehouse as a valuable part of this city's history. Erected in 1917, the plant was "one of the best organized and best equipped hosiery mills in the south" per a 1923 article by the Times-News. During this centennial year, the City would like to highlight this structure for its contribution to the history of the city by beginning the process of nominating the Dobys-Taylor Warehouse to the National Register of Historic Places.

The National Register of Historic Places is the official list of the Nation's historic places worth of preservation. Authorized by the National Historic Preservation Act of 1966, the National Park Service's National Register of Historic Places is part of a national program to coordinate and support public and private efforts to identify, evaluate, and protect America's historic and archeological resources. There are more than 90,000 properties listed in the National Register representing 1.4 million individual resources- buildings, sites, districts, structures and objects.

Listing in the National Register is the first step towards eligibility for National Park Service – administered federal preservation tax credits that have leveraged more than \$45 billion in private investment and National Park Service grant programs.

It is important to note that listing in the National Register is an honorary title given out. There are no restrictions that come with this listing on what the building can be used for or what alterations can occur to the building. Should a property owner wish to utilize the federal tax credit program, then there are some restrictions that would be taken into account to ensure that the historical significance and integrity of the structure is not lost.

We are very proud to have this structure be a part of Kingsport History and are excited for any future possibilities with this building. Should you have any questions, please feel free to contact Jessica Harmon with the Kingsport Planning Division at (423) 343-9783 or at JessicaHarmon@KingsportTN.gov.

Sincerely,

Jessica Harmon, Senior Planner

Section 8

Statement of Significance Summary Paragraph

The Kingsport Hosiery Mills in Kingsport, Sullivan County, Tennessee is eligible for listing in the National Register of Historic Places under criterion A for its contribution to the industrial development of Kingsport from 1917 until 1969. Kingsport was conceived to be an industrial based on a carefully prepared plan, and the Kingsport Hosiery Mills reflected the ideals and principles of the founders of this "Model City." The mill provided good and steady employment opportunities for economically disadvantaged people in a developing area of southern Arcalachia. It produced a quality product that realized international distribution. Its building communed to support the local economy long after it was no longer used for the manufacture of bester. It is one of the few buildings still standing which had a place of high importance in the asset of Kingsport's early industrial development.

Narrative Statement of Significance

days. Old Kingsport's commerce was generated by its location on the Great Road Nashville (Nashborough) and Washington, DC, as well as its position as the farthest point on the Holston River from which flatboats could be launched. As flatboats and marker road transportation were replaced by steamboats and railroads, Old Kingsport is clated. The Holston River was not navigable for steamboats, and the railroad built mastern Tennessee in 1859 was routed well south of the town. Following the Civil War, went into steady decline.

me decline was reversed when George L. Carter, the owner of the Carolina, Clinchfield, Railroad (CC&O), had tracks constructed which connected Kingsport with Virginia's This new rail access empowered Kingsport to become an industrial center and took place between 1910 and 1915. Taking advantage of this growth, John B.

J. Fred Johnson established the Kingsport Improvement Company in 1915. Their resulted in "the first thoroughly diversified, professionally planned, and privately drive in twentieth-century America."

Kingsport's industrial expansion, the Kingsport Hosiery Mills was incorporated on 1917. According to Manufacturer's Record, a gentleman from New York was shown the Kingsport area by J. Fred Johnson and was emotionally stirred by the austere lifestyle people. Especially the women, living in the mountains. When this gentleman asked Johnson the could do to help these people. Johnson suggested opening a basicary mill to provide opportunities for employment. Very soon thereafter, the gentleman delivered a check for \$250,000 to start the enterprise.³

Incorporation of Kingsport Hosiery Mills followed incorporation of "Modern Kingsport" by only a few days. The Charter of the City of Kingsport, Tennessee, was approved by the Tennessee General Assembly on February 28, 1917, and signed by Governor Tom C. Rye two days later. Kingsport's original Board of Mayor and Aldermen held its first meeting on March 15, 1917.

By the end of March, plans and specifications had been developed by architect W. H. Sears of Chattanooga, and a construction contract was awarded to Park-Grimes Co., also of Chattanooga. Initially, a 300 ft. long, 60 ft. wide, four-story brick building was to be erected. The construction contract amount was \$45,975. Machinery to be installed would include 500 knitters and accompanying apparatus and capitalization of the project was estimated at \$500,000.6

William Hatfield Sears, a 1904 graduate of Columbia University, worked as an architect in New York City, then briefly in Atlanta, and finally in Chattanooga. He was a member of the American Society of Heating and Ventilating Engineers, the American Institute of Architects, and the Tennessee State Board of Architectural and Engineering Examiners. While in New York, working for Snelling and Potter, he was responsible for the Staten Island Terminal. W. H. Sears designed a number of buildings of various types and uses in the Chattanooga area. One building designed by Mr. Sears is Marion Post No. 62, an Egyptian Revival style building in South Pittsburg, Tennessee, listed in the National Register (NRHP 11/22/2016). Sears designed at least three hosiery mills in and near Chattanooga in 1919: A 200 ft. X 50 ft. brick building for Davenport Hosiery Mills (Chattanooga), a 60 ft. X 540 ft. building for United Hosiery Mills (Chattanooga), and a 50 ft. X 100 ft. building for Richmond Hosiery Mills (Graysville, TN).

America's Textile Reporter: For the Combined Textile Industries reported that the Kingsport Hosiery Mills' early directors were Mark W. Potter, H. R. Dennis, J. Fred Johnson, J. C. Stone, and W. B. Davis. 11 Many of these men were important and influential in the establishment and early history of Modern Kingsport.

Mark W. Potter replaced George L. Carter as President of the Carolina, Clinchfield and Ohio Railroad in 1911. He was also a member of the board of directors of Federal Dyestuff and Chemical Corporation which was the first manufacturing facility constructed in Kingsport. 13

- H. R. Dennis was the brother of John B. Dennis. Although John B. Dennis, as a co-founder of the Kingsport Improvement Corporation, is very well known for his involvement in Modern Kingsport's early development, his brother, H. Ray Dennis, was also involved with the Carolina, Clinchfield and Ohio Railroad and the planning of Kingsport.¹⁴
- Jerry C. Stone had a direct connection to George L. Carter, having served as his treasurer. Stone invested heavily in the Kingsport Brick Corporation, which was established in 1910, and in the Kingsport Pulp Corporation, later known as Mead Corporation, which was organized in 1916 and began production in 1917. These two businesses were among the first five industries to develop in Kingsport between 1910 and 1917 following completion of the railroad. ¹⁵
- J. Fred Johnson has been called "the Father of Kingsport" by local residents. Originally from Hillsville. Virginia. Johnson came to Kingsport as a result of his association with his brother-in-law. George L. Carter. After working for a time optioning land for the Carolina, Clinchfield, and Ohio Railroad and in other capacities under George L. Carter, Johnson was made President of Kingsport Improvement Corporation on New Year's Eve 1915. He was devoted to fair treatment of employees by business owners. Johnson was quoted by *Readers' Digest* as saying

"We have no room for sweatshops." These beliefs were reflected in the way the owner of Kingsport Hosiery Mills treated employees.

Of the five men who comprised the mill's first board of directors, W. B. Davis was the only one not associated with other aspects of the early development of Modern Kingsport. He was the president of W. B. Davis and Son Company, which owned hosiery mills in Fort Payne, Attalla, and Gadsden, Alabama. The W. B. Davis Hosiery Mill (NRHP 05/08/1986) in Fort Payne, Alabama, began hosiery milling operations in 1909 and is listed in the National Register of Historic Places. It is responsible for the introduction of hosiery manufacture in Fort Payne, which has been called the "Sock Capital of the World." Evidence indicates that Davis was in agreement with J. Fred Johnson regarding treatment of employees. Davis's mill complex at Fort Payne included a swimming pool, an interdenominational church, and a clubhouse for use by employees. 19

When operations began in 1917, the Kingsport Hosiery Mills plant had the capacity to produce 26,400 pairs of finished hose daily and it employed 85 people. By the end of 1919, the number of employees had increased to 150 and General Manager John H. Baines expected to increase output by 50 percent. Company president W. B. Davis had established a nursing service, a health plan, a rest area, and a restaurant for the mill's employees by the end of 1919. In November of that same year, Mr. Davis began carrying out plans to develop a park on the grounds surrounding the building with the idea of providing the employees with opportunities for recreation during their lunch period and after working hours. 22

When other industrial plants in Kingsport had to suspend operations in early December 1919 due to a coal shortage created by a miners' strike, the Kingsport Hosiery Mills was the only factory able to continue production. Because it used power generated by Kingsport Utilities, it was allowed to operate on a 48-hours-per-week basis. ²³ Instead of shutting down, the mill was hiring. On December 19, Kingsport Hosiery Mills placed an advertisement on page five of *The Kingsport Times* notifying the public that it had "openings for fifteen additional girls over sixteen years of age." The ad touted the fact that "Experienced girls whom we have taught are making from twelve to twenty dollars per week." Successful applicants would start work on December 29.²⁴

Fourteen months after the end of World War I, between January 1920 and July 1921, the United States experienced a sharp deflationary recession. At some point during this period all of Kingsport's industrial plants became inactive, except for Kingsport Hosiery Mills. "It did not suspend operations for so much as a month, and during 1921 and the early part of 1922, when the hard times were perhaps at their worst, its steady payroll meant much to Kingsport." ²⁵

In February 1923, the mill employed 200 persons and was considering increasing this number to 250. The strategy for increasing employment was part of the company's plan to increase product output. It was credited by the *Kingsport Times* with giving the town's business section the benefits of a considerable and steady payroll and providing employment to people who would not otherwise be able to find work.²⁶

On page three of its February 23, 1923, issue, the *Kingsport Times* provided a description of the Kingsport Hosiery Mills as the facilities existed at that time. "The hosiery mill building, a three-story brick structure of very attractive architecture and modern design, was erected at a cost of \$85,000. It consists of a main building with ground dimensions of 50 feet by 150 feet and a wing with ground dimensions of 50 feet by 100 feet. The total floor space of the entire building is 35,000 square feet, or nearly an acre."

"The wing is only one story high and houses the boarding, dyeing and pressing departments."

"The main building is three stories in height, exclusive of the basement. In the basement there is a lunch room for the employees and a stock room. The private and general offices, the finishing department, and the clocking department are located on the first floor. On the first floor there is also a box factory, the plant making its own boxes in which to ship its product."

"The second floor is occupied by the looping, inspecting and mending departments, and by a fully equipped hospital room and rest room."

"On the third floor are the winding, knitting and ribbing departments. The machinery for the work carried on in these departments consists of five winding machines, 258 knitting machines, and 28 ribbing machines. Forty employees work on this floor."

"The entire building is especially well lighted, heated and ventilated. The rooms where the women work are kept spotlessly clean, and all of the surroundings are sanitary."

"The mill is equipped with the latest automatic machinery throughout, enabling it to produce in the most efficient manner and at a minimum of wastage in labor or material. A great deal of this machinery was installed during the past year..."

"Perhaps there is no other hosiery mill in the country where more precautions are taken to safeguard the health and welfare of the employees than are taken in the Kingsport Hosiery Mills. In the local plant every step possible has been taken to insure their comfort and to provide them with not only sanitary but comfort giving and attractive surroundings."

"The lunch room, before mentioned, gives them a private and commodious place in which to eat their lunch, and hot coffee is served free over the lunch counter at noon."

"Besides being spotlessly clean and orderly on the interior, the hosiery mill is, on the exterior, one of the most attractive plants in Kingsport. The grounds are kept scrupulously neat and are covered with a beautiful bluegrass sod, with cinder driveway."

The mill's production continued to increase steadily. By 1928 its daily output had expanded to 26,400 pairs and the number of employees increased to 417, of which 296 were women. Approximately ten railroad car loads of finished product were shipped each month, while fourteen cars of raw materials were received. It ranked among the leading hosiery mills of the South, and its products were sold under a variety of trademarks. The mill's products found markets throughout the United States, and in parts of Canada, Europe, South America, and China.²⁷

Initially, the mill made seamless hose for ladies, men, and children. Raw materials for this product included artificial silk from New York and Chicago, and mercerized cotton or yarn from Chattanooga, Tennessee. In the summer of 1927, the mill began production of full fashion hose for ladies. For this product, only pure silk from Japan was used.²⁸

Although the Kingsport Hosiery Mills continued to thrive through the recession of 1920 and 1921, it did not fare as well during the Great Depression which began in October of 1929. By 1932 Kingsport Hosiery Mills had closed and its machinery was removed. In that same year, the Miller-Smith Hosiery Mill began operations in the recently-vacated buildings. An extension was added which was more suitable to the type of machines used by Miller-Smith. With only seventy employees and an output of 2400 pair per day, both employment and production were significantly reduced from the pre-recession days. The facility was devoted to the knitting of full-fashioned women's hosiery. 29

Miller-Smith Hosiery Mill differed from the original Kingsport Hosiery Mills not only in output, employment, and product, but also in the relationship between owners and employees. The Women's Bureau of the Department of Labor noted in a 1935 survey that there were no doors on toilet compartments, unsanitary water fountains, and not enough seats for occasional periods of rest. In September of that same year, employees of the mill went on strike over the allegation that union members had been discharged after they allegedly forced a nonunion employee to leave the mill. Four years later, the Wage and Hour Division of the U. S. Department of Labor issued special certificates for the employment of laborers in the hosiery industry which allowed certain mills to pay wages lower than the minimum wage established in the Fair Labor Standards Act of 1938. The Miller-Smith Hosiery Mill in Kingsport was on the published list of businesses granted this special allowance.³¹

By XXXX, Miller-Smith Hosiery Mill was no longer operating in Kingsport, and the Kingsport Press took over the buildings. They used the original parts of the building until 1945 and used sections that were added until the business closed in 2006.³² The Kingsport Press's use of the mill buildings was facilitated by the fact that they were located directly across Clinchfield Street from The Press facilities. The building's use by the Kingsport Press gives it a continued connection with the major engines of industrial development in Kingsport.

For fifty years, the Kingsport Press was a powerful Tennessee presence in the publishing world. It was established in 1922 by Blair and Company, the New York bankers responsible for financing the Clinchfield Railroad (holding company for the Carolina, Clinchfield and Ohio Railway). At that time, John B. Dennis was chairman of the board for the Kingsport Press. In 1925 the press's fields of publications underwent major diversification to include encyclopedias and textbooks. The resulting increase in capacity meant that floor space was enlarged from a few hundred square feet to 12.5 acres. Employment rose to accommodate additional shifts so the press could operate 24 hours a day. The company continued to grow and in 1961 underwent another expansion of its facilities. Employment peaked within a few years at 2.500. Although the Kingsport Press was able to keep up with rapid technological advances for a time, the changing needs of the publishing industry eventually surpassed the press's ability to adapt, and the plant closed in April 2006. At that time, 425 people were employed at that plant. In recognition of

this business's important contribution to economic development in Kingsport, an actual-size reproduction of an old-style elevated water storage tank has been erected where Kingsport Press facilities were located. The tank displays the words "Kingsport Press" and it is visible from the Kingsport Hosiery Mills building.

In 1945, Dobyns-Taylor Hardware purchased the property and began using parts of it as a warehouse. Although Dobyns-Taylor was not a component of Kingsport's industrial development, it was an important part of the city's commercial development.

The origins of Dobyns-Taylor Hardware can be traced to 1910, when the Rotherwood Interstate Mercantile Company combined its two stores into a single location on Shelby Street (a street in what would become downtown Kingsport). This action started a new retail business called Kingsport Stores. Known as the "Big Store," this business sold a wide variety of goods and was operated and subsequently owned by J. Fred Johnson. The "Big Store" generated a number of offshoot businesses, one of which was Dobyns-Taylor Hardware, which opened its doors in 1922. 34 Started by George W. Taylor, Sr. and S. Flem Dobyns, the business was, for a time, the largest hardware store in Sullivan County and sold chinaware, jewelry, glass, paint, varnish, cement, kitchen furnishings, stoves, ranges, sporting goods, harnesses, and farm equipment. 35 The business operated for many years and opened outlets in the neighboring towns of Elizabethton, Jonesborough, and Rogersville, Tennessee. 36

Initial owners George W. Taylor, Sr. and Flem Dobyns were prominent Kingsport citizens and contributed to the city's development. George W. Taylor, a director of the First National Bank and of the Kingsport Federal Savings and Loan Association, served as a member of the advisory boards of both firms. He was a member of the City of Kingsport Board of Mayor and Aldermen in the late 1940s and early 1950s and was on the Kingsport Zoning Board. He served on numerous boards for community and education organizations and for Kingsport's Broad Street Methodist Church.³⁷ Flem Dobyns, the son of modern Kingsport's first Mayor, J. W. Dobyns, was involved in the civic affairs of the community throughout his life. Like Taylor, he served on several committees and boards of directors and was a member of numerous civic organizations. He organized large community events and assisted with organization of the Kingsport Merchant's Association, which eventually became known as the Kingsport Area Chamber of Commerce. One of Dobyns' ideas resulted in establishment of an event known as the "Santa Train," which has been making its rail excursion north from Kingsport taking gifts and candy to children in the coal fields of Appalachia every November since 1943.³⁸

When Dobyns-Taylor Hardware ceased retail operations in 1985, it continued to maintain the former hosiery mill as a warehouse. Since then, space has been leased to various tenants needing storage facilities in downtown Kingsport.

Proposal for Phase I Environmental Site Assessment

Tax Parcel 046I A 024.00, 435 Press Street

Kingsport, Tennessee 37660 S&ME Proposal No. 23400004

Dear Mr. Rose:

S&ME, Inc. (S&ME) appreciates the opportunity to provide this proposal to the Kingsport Economic Development Board (KEDB) to perform a Phase I Environmental Site Assessment (ESA) for the referenced property in Kingsport, Tennessee (site). This proposal provides background information, our understanding of services to be performed, our proposed schedule, and fees. Services will be provided in accordance with the terms of our Agreement for Services (Form AS-071) which is incorporated as part of this proposal and is provided as a means to authorize services.

Background Information

Information we have concerning the subject property was provided via telephone conversation on January 11, 2023, between Mr. John Rose (KEDB) and Ms. Carol Ford (S&ME). Further information was obtained from Tennessee Property Data Viewer website. S&ME understands a transaction involving the subject property may occur and a Phase I ESA is requested by the KEDB.

The subject property encompasses approximately 3.1 acres and is identified as tax parcel 046I A 024.00 located at 435 Press Street, Kingsport, Sullivan County, Tennessee. An aerial image showing the proposed assessment boundary is attached as Figure 1. Currently, the subject property is developed with five buildings built in 1900, ranging from one to five story construction comprising approximately 110,000 square feet of a former hosiery manufacturing facility and warehouses.

Scope of Services

The most widely utilized standard for performing Phase I ESAs is the standard developed by ASTM International (ASTM) entitled E1527-13, Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process. An assessment performed in accordance with this standard satisfies requirements for All Appropriate Inquiries (AAI) as presented in 40 CFR Part 312, and thus, fulfills one requirement for a qualified User to qualify for certain Landowner Liability Protections (LLPs). We propose to use ASTM E1527-13 for the proposed project. If another procedure must be used, such as specified by a lender, please provide us a copy of that procedure prior

Kingsport, Tennessee 37660 S&ME Proposal No. 22400032 Phase 009

to authorizing us to proceed. Use of an alternate procedure may require a change to the fee and schedule quoted in this proposal.

We understand that the proposed Phase I ESA is being performed in connection with a potential transaction involving the subject property. Accordingly, the purpose of the assessment is to identify recognized environmental conditions (as defined by ASTM) in connection with the property.

S&ME's approach to performing a Phase I ESA under the ASTM E1527-13 Standard Practice includes a review of the public record, interviews, a site reconnaissance, and preparation of a written report containing findings, opinions, and conclusions. Current interpretations of the E1527-13 scope indicate that the potential for contaminants in vaporous form to migrate onto the subject property should be considered in conjunction with evaluation of contaminated soil or groundwater. To address this issue, ASTM developed a new "two-tiered" process to evaluate this potential, E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in a Real Estate Transaction. Tier 1 of the vapor encroachment screening, as outlined in E2600-15, is included in this proposal.

Task I - Review of the Public Record

A review of public records for the site and the immediate vicinity will be conducted to characterize environmental features of the site and to identify past and present land use activities, on or in the vicinity of the site, which may indicate a potential for recognized environmental conditions. The review of the public record will include:

- 1. Review of federal, state, and tribal standard environmental record sources as well as selected local records in accordance with the minimum search distances specified in ASTM E1527-13. The search of most records will be performed by a firm specializing in this service subcontracted to S&ME with results presented in a written report that will be appended to S&ME's Phase I ESA report.
- 2. Examination of one or more of the following historical sources: aerial photographs, fire insurance maps, property tax records, street directories, United States Geological Survey (USGS) 7.5-minute topographic maps, building department records, and zoning/land use records of the site and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.

Task II - Site Reconnaissance

A site reconnaissance will be performed to identify visual signs of environmental conditions on or adjoining the site, and to evaluate evidence found in the review of public record that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited on the site. The site reconnaissance will include the following activities:

- 1. A visual reconnaissance of the site and adjoining properties will be performed to observe signs of spills, stressed vegetation, buried waste, underground storage tanks (USTs) or above ground storage tanks (ASTs), subsidence, transformers, or unusual soil discoloration which may indicate the possible presence of hazardous substances (per CERCLA) or petroleum products.
- 2. The periphery of the property will be viewed and a walk-through of accessible areas of the site interior will be conducted.

Kingsport, Tennessee 37660 S&ME Proposal No. 22400032 Phase 009

3. Areas of the site will be photographed to document the current use(s) of the property as well as significant conditions such as unusually discolored soil, stressed vegetation, or other significant features associated with the property.

Task III - Interviews

Interviews with appropriate local officials will be conducted to consider any local knowledge of hazardous substances or petroleum products on the subject property or on adjacent properties. In addition, current property owner(s), operators and occupants will be interviewed regarding the potential for contamination at the subject property to the extent they have been identified by the Client. Interviews with past owners, operators and occupants may be necessary, particularly if the current owner has held title for less than two years, or if past owner interviews are necessary to fill data gaps.

Task IV - Written Report

Upon completion of the public record review, interviews, and site reconnaissance, S&ME will prepare a written report documenting findings, opinions and conclusions. The report will reflect our evaluation for use by the client in completing the planned property transaction. The conclusions will be presented in terms of the presence or absence of recognized environmental conditions as defined in ASTM Standard Practice E1527-13. The report will be issued in PDF format and will be submitted via electronic mail.

Task V – Tier 1 Vapor Encroachment Screening

Should a potential vapor encroachment condition (VEC) be identified at the site S&ME will perform a Tier 1 Vapor Encroachment Screening as outlined in ASTM E2600-15. The purpose of Tier 1 is to conduct a screening using information assembled for the Phase I ESA as well as other physical and chemical data to determine if a VEC exists at the subject property. Accordingly, Tier 1 services would include the following considerations:

- 1. Establish an area of concern (AOC) up-gradient, down-gradient, and side-gradient of the subject property with respect to possible sources of contaminant vapors.
- 2. Identify the existing and planned use of the subject property.
- 3. Identify the type(s) of existing and planned structures on the subject property.
- 4. Describe the current use of the area surrounding the subject property.
- 5. Review federal, state, local and tribal governmental records for the subject property and AOC.
- 6. Review records of past use of the subject property and surrounding properties within the AOC for potential sources of chemicals that could potentially migrate through the subsurface as vapors.
- 7. Examine the physical setting including soil types as well as geological, hydrogeological, hydrologic, and topographic information.
- 8. Evaluate potential natural and man-made preferential pathways that could function as a direct path for vapors.
- 9. Specialized or commonly known information possessed by the user.

Tier 1 conclusions would indicate whether a VEC exists or does not exist. In the event a VEC exists, the client may authorize a more refined Tier 2 screening. Tier 2 may include a review of reasonably ascertainable regulatory files

Kingsport, Tennessee 37660 S&ME Proposal No. 22400032 Phase 009

or other documents, or invasive data collection such as sampling of soil, soil vapor, and/or groundwater. The cost and schedule to perform Tier 2 services are not included in this proposal.

Excluded Services

The Phase I ESA is limited to the range of contaminants identified as hazardous substances by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and petroleum products. Compounds that are not defined by CERCLA as a hazardous substance, including emerging contaminants such as polyfluoroalkyl substances (PFAS), are excluded. Similarly, Controlled Substances as defined in the Controlled Substances Act (21 U.S.C. §802) are excluded.

Unless specifically authorized as an addition to the Phase I ESA Scope of Services, the assessment will not address environmental conditions not specifically included in the ASTM E1527-13 standard including, but not limited to sampling of materials (i.e., soil, surface water, groundwater or air) or the assessment of business risk issues such as asbestos; lead paint; mold or moisture intrusion; regulatory compliance; industrial hygiene; health/safety; indoor air quality, including vapor intrusion; high voltage power lines; cultural/historic resources; wetlands; ecological resources; or endangered species. Further, the scope and cost of Tier 2 Vapor Encroachment Screening is excluded from the work proposed herein. Additionally, the Phase I ESA will not include obtaining chain of title or a search for environmental liens and activity and use limitations. If this information is provided to S&ME by the Client, S&ME will review the information provided.

Limitations

As indicated in ASTM E1527-13, the practice is intended to constitute all appropriate inquiries to permit a qualified User to satisfy one requirement to qualify for Landowner Liability Protections including the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability in an approach that is both commercially prudent and reasonable. As such, the ASTM standard practice seeks to reduce, but not eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the property. Further, appropriate inquiry does not imply an exhaustive assessment of real property, but instead calls for the environmental professional to identify a balance between competing demands of limited cost and time and the reduction of uncertainty about unknown conditions. A conclusion of "no evidence of recognized environmental conditions" should not be interpreted as a guarantee or warranty that the property is "clean" or free of all contaminants. Environmental conditions may exist on the property that may not be identified through the scope of ASTM E1527-13.

Viability of the Phase I ESA

ASTM E 1527-13 states that a Phase I ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition or intended transaction is presumed to be valid if the report is being relied on by the user for whom the assessment was originally prepared. The components of the practice that must be completed within 180 days prior include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. If these components were not completed within 180 days, or if the report is to be used by an entity other than the

Kingsport, Tennessee 37660 S&ME Proposal No. 22400032 Phase 009

User for whom the assessment was originally prepared, additional information is required to comply with the ASTM E 1527-13 practice.

Client Responsibilities

The Scope of Services, fee and project schedule presented herein are contingent upon the client fulfilling the following responsibilities:

- 1. Provide a signed Work Authorization form to authorize services (attached).
- 2. Provide the name and contact information for past and present property owner(s), operators, and occupants to enable us to conduct the interviews specified in ASTM E1527-13.
- 3. Coordinate and provide access to the property.
- 4. Complete and return the attached User Questionnaire as specified in ASTM E1527-13 including a review of recorded land title and judicial records for environmental liens or activity and use limitations.
- 5. Provide copies of all existing environmental reports or testing results relating to conditions at the subject property that may be available to the client (see attached User-Furnished Information checklist).
- 6. Identify the addressees of the Phase I ESA report such as a lender, if applicable.

Schedule

The Phase I ESA scope of work outlined above can normally be completed within approximately 15 business days of written authorization to proceed. If the proposed schedule needs to be condensed to meet your needs, please notify us and we will evaluate how it may be compressed. Our schedule and fee are contingent upon your completion of those items listed under Client Responsibilities in this proposal. Please note that our ability to complete the services involved in the review of the public record within the project schedule often depends on the availability of certain maps and records that we may want to review or personnel whom we would want to interview. If we were to experience difficulties in this regard, we would inform you at the earliest possible time and obtain your concurrence on extending the evaluation time or terminating that aspect of the evaluation with a discussion of the ramifications of producing the report without the benefit of that information. ASTM Standard Practice E1527-13 states that information is reasonably ascertainable if it can be provided for review within 20 days of the request. If information which we request to review is not made available within a 7-day period, we would consult with you on whether to extend our scheduled completion date or to complete the project without the benefit of that information (either option will satisfy ASTM Standard Practice E1527-13 requirements).

Fee

This lump sum fee includes labor and expense necessary to complete the Tasks as presented herein and the deliverable of an electronic report in PDF format. Should a hard copy of the report be requested, an additional fee of for each report copy will be invoiced to the Client. This quotation is valid for a period of 90 days. Written reliance on the Phase I ESA will be provided to the client and one additional third party, provided the additional third party is identified prior to completion of the report. Additional reliance letters issued to third parties after the completion of the report may be provided under the terms and conditions of our Agreement for

James R. Bruce, P.G.

Senior Reviewer

Kingsport, Tennessee 37660 S&ME Proposal No. 22400032 Phase 009

Services for per request. The additional party's use and reliance on the report will be subject to the same rights, obligations, and limitations imposed on the client by our Agreement for Services. However, the total liability of S&ME to all parties of the Phase I ESA shall be limited to the remedies and amounts as provided in the Agreement for Services as a single contract. The additional party's use and reliance on the report shall signify the additional party's agreement to be bound by the Agreement for Services between S&ME and the client.

Use of Proposal/Report

This proposal is solely intended for the services as described in the Scope of Services. The Scope of Services may not be modified or amended, unless the changes are first agreed to by the Client and S&ME. Use of this proposal and any resulting documents will be limited to the referenced project, Client, and designated additional third party. No other use is authorized by S&ME. This proposal does not provide any claim or warranty for future uses of the property.

Authorization

Our Agreement for Services, Form Number AS-071, is attached and is incorporated as a part of this proposal. Please indicate your acceptance of our proposal by signing the form and returning it to our office. We will then proceed with the performance of services. If you elect to accept our proposal by issuing a purchase order, then please reference this proposal number and date. Your purchase order will be an acceptance of our Agreement of Services and an authorization to proceed with the performance of our services. The terms and conditions included in any purchase order shall not apply, as our agreement is for services that are not compatible with purchase order agreements. If this proposal is transmitted to you via email, and if you choose to accept this proposal by email, your reply email acceptance will serve as your representation to S&ME that you have reviewed the proposal and the associated Agreement for Services (AS-071) and hereby accept both as written.

Closing

If you have any questions regarding our proposed Scope of Services, please call me at 423-612-3043.

Sincerely, **S&ME**, Inc.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

	Ser Questionnaire TE: S&ME Project No:
m	order to qualify for Landowner Liability Protections (LLPs), ASTM E1527-13 specifies that the ESA User ust provide the following information, if available, to the Environmental Professional. Failure to provide is information could make the ESA incomplete and the User unable to qualify for LLPs.
1.	Are you aware of any environmental clean-up liens against the property that are filed or recorded under federal, tribal, state or local laws?
2.	Are you aware of any Activity and Use Limitations (AUL's) such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, state or local laws?
3.	As the User of this ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties?
4.	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If not, is the lower purchase price attributable to known or suspected contamination?
5.	Are you aware of information about the property that would be helpful in identifying conditions indicative of contaminant releases, such as: a) past use of the property; b) presence of specific chemicals (past or present); c) spills or chemical releases at the property; or d) environmental cleanups that have taken place at the property?
6.	As the User of this Phase I ESA and based on your knowledge and experience of the property, are there any obvious indicators that point to the presence or likely presence of contamination on the property?
ir	n addition, certain other information should be provided although not necessarily to qualify for LLPs, including: contact information for past and current property owners, operators and occupants; the reason for performing this ESA; and locumentation showing the property address, location and boundaries.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

User-Furnished Information

SITE: S&ME Project No:	
The following is a list of documents and information that could be useful to S&ME, Inc. in preparing your Phase I Environmental Site Assessment (ESA). Please check the appropriate boxes below, sign, and fax or mail this form along with signed Agreement for Services and completed User Questionnaire. This form will be attached to, and made a part of, your completed Phase I ESA.	
Yes No 1. Environmental site assessment reports. 2. Environmental audit reports. 3. Environmental permits (i.e. solid waste disposal permits, hazardous waste disposal permits, &wastewater permits, NPDES permits). 4. Registrations for underground and above-ground storage tanks. 5. Material safety data sheets (MSDS). 6. Community right-to-know plan.	
7. Safety plans; preparedness and prevention plans; spill prevention, counter-measure and control plans, etc.	
8. Reports regarding hydrologic conditions on the property or surrounding area. 9. Reports of any past or current environmental remediation on-site or on adjoining properties. 10. Notices or other correspondence from any government agency relating to past or existing environmental liens encumbering the property.	
11. Hazardous waste generator notices or reports. 12. Geotechnical studies. 13. Report of earthwork or land filling activities on-site. 14. Information concerning any pending, threatened, or past litigation or administrative proceedings	
relevant to hazardous substances or petroleum products. 15. Notices from any governmental entity regarding any possible violation of petroleum environmental laws or possible liability relating to hazardous substances or products. 16. Disclosure of sumps, pits, drainage systems (i.e. the existence of and location).	
17. Building plans (architectural, utility, structural). 18. Description of current site operations, including layout drawings or sketches. 19. Title report/chain-of-title.	
20. Tax assessor records (previous owner and occupants). 21. Purchase price analysis (if lower than comparables). 22. Current and historical photographs of the site. 23. Current and historical topographic maps of the site.	
I have reviewed the above list and checked the "Yes" box for those items that would be available to S&ME for review and/copy.	/or

SERVICES TO BE RENDERED				
Proposal Number: 23400004 dated: January 24, 2023 is incorporated into this Agreement For Services and this Agreement For Services is incorporated into this Proposal.				

Client desires to contract with Consultant for the Services to be Rendered ("Services") on Client's Project, as contained in Consultant's Proposal. The Proposal and Client's Project are referenced immediately above.

THEREFORE, in consideration of the Mutual Covenants and Promises included herein, Client and Consultant agree as follows:

- 1. <u>ACCEPTANCE</u>: Client hereby accepts this offer by Consultant to provide the Services as contained in Consultant's Proposal and agrees that such Services and any additional Services performed by Consultant shall be governed by this Agreement. If Client directs that Services commence prior to execution of this Agreement, Client agrees that commencement of Services by Consultant is acceptance of the terms of this Agreement. CLIENT MAY ACCEPT THIS AGREEMENT FOR SERVICES THROUGH THE USE OF CLIENT'S PURCHASE ORDER, HOWEVER ALL PREPRINTED TERMS AND CONDITIONS ON CLIENT'S PURCHASE ORDER ARE INAPPLICABLE, ARE EXPRESSLY REJECTED, AND THE TERMS OF THIS AGREEMENT SHALL GOVERN. Unless this offer is previously accepted, it will be withdrawn automatically at 5:00 pm EST, thirty (30) days from the date of issue.
- 2. CONTRACT DOCUMENTS: "Contract Documents" shall mean this Agreement for Services the Proposal identified under "SERVICES TO BE RENDERED," and all mutually executed Change Orders. This Agreement for Services along with the Contract Documents represent the entire understanding and agreement between the parties relating to the Services and supersedes any and all prior negotiations, discussions, and agreements, whether written or oral, between the parties regarding same. Any terms and conditions which Client is obligated to perform or satisfy, whether by law or contract, or proposed in any acknowledgments or acceptance by Client which are in addition to, or different from, this Agreement for Services along with the Contract Documents are hereby expressly rejected and shall not become part of the agreement between the

parties without Consultant's specific written consent. Any acceptance by Client is limited to acceptance of the express terms set forth in this Agreement for Services.

3. SCOPE OF SERVICES: Unless otherwise stated in writing, Client assumes sole responsibility for determining whether the quantity and the nature of the services included in Consultant's proposal received by Client are adequate and sufficient for Client's intended purpose. Client shall communicate the provisions of this Agreement for Services to each and every third party to whom Client transmits any part of Consultant's work. Consultant shall have no duty or obligation to any third party except as specifically set forth in Consultant's proposal.

Consultant has provided Client with the Proposal identified under "Services to be Rendered." By signing below, Client agrees that Client or the Client's representative has examined Consultant's proposal, which includes a scope of work to be performed by Consultant, an opinion on the cost to perform Consultant's scope of work, and an opinion on the amount of time required to perform Consultant's scope of work along with any other documents, opinions, or advice prepared or provided by Consultant and Client agrees that Client is fully satisfied with Consultant's Proposal and Client obtained the advice of any other consultant(s) as the Client deems necessary to protect the Client's interests. Client also agrees by signing below it is responsible for requesting additional services not included in Consultant's proposal and if necessary, Client agrees it is responsible (even if delegated to a third party) for notifying and scheduling Consultant so Consultant can perform the Services. Consultant shall not be responsible for damages caused by services not performed due to any failure to request or schedule Consultant's Services. If project conditions change materially from those described to Consultant at the time of proposal, Consultant is entitled to a change order equitably adjusting its Services and fee.

Consultant shall not supervise, direct or have control over the Client's work nor have any responsibility for the construction means, methods, techniques, sequences or procedures selected by the Client's contractor and/or agents. These rights and responsibilities are solely those of the contractor or agent in accordance with its agreement with Client. Only Client has the right to reject or stop work of its contractor or agents. Consultant's presence on site does not in any way guarantee the completion, quality or performance of the work by any other party retained by Client. Consultant does not guarantee the performance of any contractor or agent of Client and shall not be responsible for such party's failure to perform its work in accordance with any applicable documents, including but not limited to, the plans and specifications or any applicable laws, codes, rules or regulations.

Any evaluations of the Client's budget for the project, and any preliminary or updated estimates of the cost of the work prepared by Consultant represent Consultant's judgment as a design professional familiar with the construction industry. It is recognized, however, that neither Consultant nor Client has control over the cost of the labor, materials or equipment, over the contractor's methods of determining bid prices, or over competitive bidding, market or negotiating conditions. Accordingly, Consultant does not warrant or represent that bids or negotiated prices will not vary from Client's budget for the project, or from any estimate of the cost of the work evaluation prepared or agreed to by Consultant.

- 4. CHANGE ORDERS: Client may request changes to the scope of Services by altering or adding to the Services to be performed. If Client so requests, Consultant will provide a change order proposal including Client's requested changes to the scope of Services for Client's review and approval. Following Client's approval, Client shall provide written acceptance and such Change Order Proposal shall become part of the Contract Documents and shall supersede any prior conflicting terms. If Client does not follow these procedures, but instead directs Consultant to perform changed or additional work without an executed change order, (1) the Services are changed according to Consultant's understanding of Client's direction; and (2) and Consultant will be paid for this work according to the current fee schedule plus fifteen percent (15%).
- 5. PAYMENT: Client will pay Consultant for Services and expenses in accordance with the Contract Documents. If prices for Services are not specified in the Contract Documents, Consultant's current fee schedule in effect for the type of services performed shall control. Unless otherwise agreed prior to the start of the Services, Consultant will submit invoices to Client monthly and a final invoice upon completion of Services. Payment is due upon receipt of the invoice unless otherwise agreed to in writing prior to the submittal of the invoice.

Invoices are past due 30 calendar days after the date of the invoice. Past due amounts are subject to a late fee of one and one-half percent per month (18 percent per annum) or the highest amount allowed by applicable law on the outstanding balance, whichever is less. Attorney's fees and other costs incurred in collecting past due amounts shall be paid by Client. The Client's obligation to pay under this Agreement is in no way dependent upon the Client's ability to obtain financing, payment from third parties, approval of governmental or regulatory agencies, or Client's successful completion of the Project. In addition, CONSULTANT reserves the right to suspend the performance of all services in any case where invoices remain unpaid more than sixty (60) days from the invoice date.

To verify the CLIENT's requirements for appropriate invoicing, the following information is requested.

CLIENT Accounts Payable contact name:

CLIENT Accounts Payable contact phone number:

CLIENT Accounts Payable email address:

Upon execution of this document, CONSULTANT will reach out to the contact provided to gather CLIENT's required information such as purchase order number, client project number, email address or website for invoice submission, monthly deadline for invoice submission, CLIENT legal entity name for invoicing, CLIENT address for invoicing, etc.

- 6. STANDARD OF CARE: Consultant and its agents, employees and subcontractors shall endeavor to perform the Services for Client with that degree of care and skill ordinarily exercised, under similar circumstances, by consultants practicing in the same discipline at the same time and location. In the event any portion of the Services fails to substantially comply with this standard of care obligation and Consultant is promptly notified in writing prior to one year after completion of such portion of the Services, Consultant will re-perform such portion of the Services, or if re-performance is impractical, Consultant will refund the amount of compensation paid to Consultant for such portion of the Services. NOTWITHSTANDING ANY TERMS IN OR APPLICABLE TO THIS AGREEMENT, CONSULTANT MAKES NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, RELATING TO CONSULTANT'S SERVICES OR WORK PRODUCT, AND CONSULTANT DISCLAIMS ANY IMPLIED WARRANTIES OR WARRANTIES IMPOSED BY LAW, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
- 7. <u>LIMITATION OF LIABILITY</u>: Client and Consultant have evaluated the risks and rewards associated with this project, including Consultant's fee relative to the risks assumed, and agree to allocate certain of the associated risks. To the fullest extent permitted by law, Consultant's aggregate liability to Client, including that of Consultant's officers, directors, employees and agents, is cumulatively limited to \$100,000, hereinafter referred to as LIMITATION OF LIABILITY. This LIMITATION OF LIABILITY applies to all lawsuits, claims or actions, whether identified as arising in tort, INCLUDING NEGLIGENCE (WHETHER SOLE OR CONCURRENT), PROFESSIONAL ERROR OR OMISSIONS, BREACH OF WARRANTY (EXPRESS OR IMPLIED), NEGLIGENT MISREPRESENTATION, AND STRICT LIABILITY, contract, or other legal theory, including without limitation, Consultant's indemnity obligations to Client related to the Services provided in this Agreement and any continuation or extension of Consultant's Services.

By entering into this Agreement, Client acknowledges that this LIMITATION OF LIABILITY provision has been reviewed, understood and is a material part of this Agreement, and that Client has had an opportunity to seek legal advice regarding this provision.

- 8. **NO CONSEQUENTIAL DAMAGES**: In no event shall Consultant or Client be liable to the other for any special, indirect, incidental or consequential loss or damages, including, but not limited to, lost profits, damages for delay, or loss of use arising from or related to Services provided by Consultant.
- 9. **INSTRUMENTS OF SERVICE**: In connection with the performance of the Services, Consultant may deliver to Client reports, drawings, specifications, computer files, field data, notes, and other documents and instruments prepared by the Consultant reflecting Services provided and the results of such Services ("Instruments of

- Service"). Statements made in Consultant's Instruments of Service are opinions based upon engineering judgment and are not to be construed as representations of fact. All Instruments of Service, other written documents, all original data gathered by Consultant and work papers produced by Consultant in the performance of or intrinsic to the Services included in the Services are, and shall remain, the sole and exclusive property of Consultant. Files shall be maintained in general accordance with Consultant's document retention policies and practices. Client shall indemnify, defend, and hold Consultant harmless from any and all claims, damages, or losses arising from any unauthorized reuse or modification of the Instruments of Service.
- 10. **SAFETY**: Consultant has no authority and no responsibility for general job safety and for the safety of persons who are not employed by Consultant. Should Client, or third parties, be conducting activities on the Site, then each shall have responsibility for their own safety and compliance with applicable safety requirements.
- 11. **SAMPLES**: Samples are consumed in testing or disposed of upon completion of tests (unless stated otherwise in the Services).
- 12. HAZARDOUS MATERIALS: Nothing contained within this agreement shall be construed or interpreted as requiring Consultant to assume the status of an owner, operator, generator, storer, transporter, treater or disposal facility as those terms appear within RCRA or within any Federal or State statute or regulation governing the generation, transportation, treatment, storage and disposal of pollutants. Client retains full responsibility for compliance with the provisions of RCRA and any other Federal or State statute or regulation governing the handling, treatment, storage and disposal of pollutants.

13. CLIENT OBLIGATIONS:

- (a) Client warrants that all information provided to Consultant regarding the Project and Project location are complete and accurate to the best of Client's knowledge.
- (b) Client agrees to furnish (or obtain from the Owner should the Client not be the Owner) Consultant, its agents, employees, and subcontractors a right-of-entry and any authorizations needed for Consultant to enter onto the project site to perform the Services included in this Agreement.
- (c) Client recognizes that the performance of the Services included in this Agreement may cause alteration or damage to the Site. Client acknowledges that some site disturbance is inherent in the work for which Consultant will not be responsible. Should Client not be owner of the property, then Client agrees to notify the owner of the aforementioned possibility of unavoidable alteration and damage and Client shall arrange for the repair of any alteration and damage.
- (d) Client agrees to disclose the identity of all utilities serving the Project Site, the presence and accurate location of hidden or obscured man-made objects known to Client that may be in Consultant's work area and the nature and location of any known or suspected hazardous materials that may exist on the property.
- (e) The Client shall furnish, at the Client's expense, all information, requirements, reports, data, surveys and instructions required by this Agreement. The Consultant may use such information, requirements, reports, data, surveys and instructions in performing its services and is entitled to rely upon the accuracy and completeness thereof.
- (f) In order to make informed decisions based on the Instruments of Service, Client's review and study of the Instruments of Service is vital to take full advantage of the consulting process. Client shall review in detail all Instruments of Service, including attachments and references therein, and in the event of questions or concerns, shall contact the project manager. Consultant provides information in the Instruments of Service which assists the Client and/or user in understanding and using the deliverable. The information includes direction on the extent to which the information can be relied on and applied to Client's decision-making process.
- (g) Provide prompt written notice to CONSULTANT if CLIENT becomes aware of any fault or problem in the PROJECT, including any errors or omissions in CONSULTANT'S work.

- (h) Client is responsible for reporting any releases of hazardous substances to appropriate government agencies as required by law. Client acknowledges that Consultant also may have reporting obligations under controlling law and regulations. Client waives any claim against Consultant and will indemnify and hold Consultant harmless from any claim, injury or loss arising from the discovery of unforeseen hazardous substances.
- 14. **CERTIFICATIONS**: Client understands and agrees that Consultant's Instruments of Services are limited to an expression of professional opinion based upon the Services performed by the Consultant and does not constitute a warranty or guarantee, either express or implied. In addition, Client agrees that Consultant will not be required to execute any document that would result in certifying, guaranteeing or warranting the existence of conditions whose existence the Consultant cannot reasonably ascertain.
- 15. FAILURE TO FOLLOW RECOMMENDATIONS: The Client agrees that it would be unfair to hold the Consultant liable for problems that may occur if the Consultant's recommendations are not followed. Accordingly, the Client waives any claim against the Consultant, and agrees to indemnify, and hold harmless the Consultant from any claim or liability for injury or loss that results from failure to implement the Consultant's recommendations or from implementation of the Consultant's recommendations in a manner that is not in strict accordance with them.

16. TERMINATION:

- For Convenience Upon written notice, Client or Consultant may terminate the performance of any further Services included in this Agreement if the terminating party determines termination is in the terminating party's interest. Upon receipt of a termination notice by either party, Consultant shall stop work on all Services included in this Agreement and deliver any Instruments of Service complete at that time to Client and Client shall pay Consultant within thirty (30) days for all Services performed up to the dispatch or receipt of the termination notice. Upon Termination for Convenience, Consultant and Client shall have no further rights or remedies other than those included in this paragraph.
- For Cause –In the event of material breach of this Agreement, the party not breaching the Agreement may terminate it upon five (5) business days written notice delivered or mailed to the other party, which notice must identify the material breach. The Agreement may not be terminated for cause if the breaching party cures the breach within five (5) business days of receipt of the written notice. Upon Termination for Cause, Consultant shall stop work on all Services included in this Agreement and deliver any instruments of service complete at that time to Client and Client shall pay Consultant within thirty (30) days for all Services performed up to the termination. Upon Termination for Cause, Consultant and Client shall have no further rights or remedies other than those included in this paragraph.
- 17. <u>UNFORESEEN CONDITIONS OR OCCURRENCES</u>: If, during the performance of Services ,any unforeseen hazardous substance, material, element or constituent or other unforeseen or changed conditions or occurrences are encountered which, in Consultant's judgment, significantly affects or may affect the Services, the risk involved in providing the Services, or the recommended Scope of Services, Consultant will promptly notify Client. Subsequent to that notification, Consultant may: (a) If practicable, in Consultant's judgment and with approval of Client, complete the original Scope of Services in accordance with the procedures originally intended in the Proposal; (b) Agree with Client to modify the Scope of Services and the estimate of charges to include the previously unforeseen conditions or occurrences, such revision to be in writing and signed by the parties and incorporated into this Agreement; or (c) Terminate the Services effective on the date of notification pursuant to the terms of TERMINATION FOR CONVENIENCE.
- 18. **FORCE MAJEURE**: Consultant shall not be deemed to be in default of this Agreement to the extent that any delay or failure in the performance of the Scope of Work results from any causes beyond its reasonable control. For this purpose, such acts or events shall include, but are not limited to, storms, floods, unusually severe weather, epidemics, pandemics, quarantines, acts of government, civil disturbances, war, riot, strikes, lockouts or other industrial disturbances, and the inability within reasonable diligence to supply personnel, equipment, information or material to the Project. In the event that such acts or events occur, it is agreed that Consultant shall attempt to resume performance of the Services covered by this Agreement as soon as

- reasonably possible. If the force majeure event adversely affects the scope or schedule, Client agrees to modify the Scope of Services and the estimate of charges, such revision to be in writing and signed by the parties and incorporated into this Agreement.
- 19. INSURANCE: Consultant shall maintain at its own expense, during the term of this Agreement, the following insurance: (1) Workers' Compensation providing statutory coverages required by the state where services are provided, (2) Employer's Liability with limits of \$1,000,000 each accident, (3) Commercial General Liability with limits of \$1,000,000 each occurrence / \$2,000,000 aggregate, (4) Commercial Automobile with limits of \$1,000,000 each accident, (5) Umbrella Excess Liability with limits of \$5,000,000 each occurrence and (6) Professional Liability with limits of \$1,000,000 each claim.
- 20. <u>INDEMNITY</u>: Consultant shall indemnify Client from and against damages, losses and judgments arising from claims by third parties, including reasonable attorneys' fees and expenses recoverable under applicable law, but only to the extent caused by the negligent acts, errors, or omissions of Consultant in the performance of services under this Agreement. Notwithstanding any terms in or applicable to this Agreement, it is understood and agreed that Consultant shall have no affirmative defense obligations.
- 21. <u>DISPUTE RESOLUTION</u>: In the event of a dispute between Consultant and Client with regard to any matter arising out of or related to this Agreement, the Parties will use their best efforts to resolve the dispute amicably using negotiation and mediation within fifteen (15) calendar days. If the dispute cannot be settled amicably, the Parties agree that the dispute shall be resolved by litigation in a court of competent jurisdiction within the State where project is located.
- 22. **ASSIGNMENT**: Neither party may assign this Agreement, in whole or in part, without the prior written consent of the other party.
- 23. **NO WAIVER**: No waiver by either party of any default by the other party in the performance of any provision of this Agreement shall operate as or be construed as a waiver of any future default, whether like or different in character.
- 24. MISCELLANEOUS: The validity, interpretation, and performance of this Agreement shall be governed by and construed in accordance with the laws of the state where project is located without regard to choice of law provisions. This Agreement represents the entire understanding and agreement between the parties hereto relating to the Services and supersedes any and all prior negotiations, discussions, and Agreements, whether written or oral, between the parties regarding same. No amendment or modification to this Agreement or any waiver of any provisions hereof shall be effective unless in writing, signed by both Parties. If any part of this Agreement is found to be unenforceable, then the parties' intent is to have such part rewritten to attain as close as possible the original intent of the unenforceable provision, and all remaining provisions shall continue in full force and effect.
- 25. **TIME BAR**: Notwithstanding any applicable state statute of repose or statute of limitation, the Parties agree that all legal actions by either party against the other concerning this Agreement or the work performed in relation to this Agreement, will become barred two (2) years from the time the party knew or should have known of the claim, or two (2) years after completion of Consultant's Services, whichever occurs earlier.
- 26. **NO DISCRIMINATION**: To the extent applicable, this contractor and subcontractor shall abide by the requirements of 41 CFR §§ 60-1.4(a), 60-300.5(a) and 60-741.5(a) and the posting requirement under 29 CFR Part 471, appendix A to subpart A. These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity or national origin. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status or disability.
- 27. **NO THIRD PARTY LIABILITY**: Nothing in this Agreement or as a consequence of any of the Services provided gives any rights or benefits to anyone other than Client and Consultant. All duties and responsibilities

undertaken pursuant to this Agreement are for the sole and exclusive benefit of Client and Consultant and not for the benefit of any other party. No third party shall have the right to rely on the Instruments of Service without Consultant's prior written consent and the third party's agreement to be bound to the same terms and conditions as the Client.

28. INDIVIDUAL LIABILITY: CLIENT AGREES THAT CONSULTANT'S SERVICES WILL NOT SUBJECT CONSULTANT'S INDIVIDUAL EMPLOYEES, OFFICERS OR DIRECTORS TO ANY PERSONAL LIABILITY, AND THAT NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, CLIENT AGREES THAT ITS SOLE AND EXCLUSIVE REMEDY SHALL BE TO DIRECT OR ASSERT ANY CLAIM, DEMAND, OR SUIT ONLY AGAINST CONSULTANT.

CONSULTANT HEREBY ADVISES CLIENT THAT ITS PERFORMANCE OF THIS AGREEMENT IS EXPRESSLY CONDITIONED ON CLIENT'S ASSENT TO THE TERMS AND CONDITIONS DETAILED HEREIN.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their duly authorized representative.

Kingsport Economic Development Board 415 Broad Street Kingsport, Tennessee 37660

Attention: Mr. John Rose, Economic Development Director

Reference: Phase I Environmental Site Assessment

435 Press Street, Tax Parcel 046I A 024.00

Kingsport, Tennessee 37857 S&ME Project No. 23400004

Dear Mr. Rose:

The following presents the process and findings related to the Tier 1 Vapor Encroachment Screening process for the referenced site.

Introduction

S&ME has conducted a Phase I Environmental Site Assessment (ESA) for the above referenced site. The Phase I ESA was performed in accordance with ASTM International (ASTM) E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2013), which requires the consideration of confirmed or potential releases of hazardous substances and/or petroleum products that may pose a threat of contamination to the subject property, including an evaluation of the potential migration of vapors. The evaluation of potential migration of contaminant vapors for this Phase I ESA, herein referred to as a Tier 1 Vapor Encroachment Screening (VES), was accomplished utilizing procedures described as Tier 1 Screening in ASTM E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM 2015) and, if applicable, using the refined search distances presented by Buonicore (2009), as described below.

Purpose

The purpose of this VES is to assist in evaluating the existence of Vapor Encroachment Conditions (VECs) at the subject property. The VES was performed to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property. The presence or likely presence of vapors containing chemicals of concern in the subsurface of the subject property constitutes a VEC and may also constitute a recognized environmental condition (REC), as defined by ASTM E1527-13.

S&ME Project No. 22400078

Evaluation Process

The following information was reviewed during the Tier 1 VES to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property:

- The type of contaminant (petroleum product vs. non-petroleum product) known or suspected to have been stored on-site or at identified off-site sources;
- The distance between identified off-site sources and the nearest subject property boundary;
- Information of known or assumed groundwater flow directions(s) with respect to the subject property;
- The potential for preferential pathways or barriers to exist between the identified off-site sources and the subject property boundary; and,
- Physical setting and other information sources.

The ASTM E 2600-15 Tier 1 Screening process recommends initial screening distances to estimate contaminant plume length and width with no empirical plume data. In cases where the direction of groundwater flow is known or can be reasonably assumed, those distances were refined under a conservative scenario using calculations presented by Buonicore (2009). The resulting vapor screening distances (i.e., distances from a potential off-site contaminant source to the nearest boundary of the subject property) are presented in Table 1 with respect to the type of contaminant and the known or presumed direction of groundwater flow.

Table 1 - VES Area of Concern (AOC) Screening Distances

Contaminant Type	Source Location with respect to the nearest Subject Property boundary and considering known or assumed groundwater flow direction ⁽³⁾			
71	Up-gradient	Cross-gradient	Down-gradient	
Non-petroleum COC ⁽¹⁾ (see ASTM E 2600-15, Appendix X6)	1,760 feet (1/3 rd mile)	365 feet	100 feet	
Petroleum COC NAPL (2)	528 feet (1/10 th mile)	165 feet	100 feet	
Petroleum COC Dissolved	528 feet (1/10 th mile)	95 feet	30 feet	

Notes: (1) COC – Chemicals of Concern

(2) NAPL – Non-Aqueous Phase Liquid (i.e., free product)

(3) Groundwater Flow Direction – if not known or assumed, use search distance of 1,760 feet for up-gradient, crossgradient, and down-gradient Johnson City, Tennessee 37604 S&ME Project No. 22400078

Results

Table 2 - Identified Potential Contaminant Sources

Contaminant Source	Distance, direction, and groundwater flow direction (with respect to nearest subject property boundary)	Contaminant Type and Screening Distance	Vapor Encroachment Condition Determination
Town Loft Apartments (a.k.a. Old Roberts and Johnson Lumber Yard	452 Press Street 346 ft. NNW (EDR) From the UST site 215 ft.	Petroleum COC Dissolved (30 feet)	VEC does not exist
Quebecor Printing	335 Roller Street 650 ft. WNW (EDR) 90 ft. (actual)	Non-petroleum COC (100 feet)	VEC does exist
Regions Bank (a.k.a. Texaco, Duffer-Taylor General Tire and Kennedy's Pat Auto Repair)	437 and 461 West Center Street 600 ft. S	Petroleum COC (1760 feet)	VEC does exist
Kingsport Transit	109/140 Clay Street 1400 – 1672 ft. S	Petroleum COC (528 feet)	VEC does not exist

The Town Loft Apartments (a.k.a. Old Roberts and Johnson Lumber Yard) site listed above was identified as a LUST, UST, HIST UST, VCP, and SRP site by the regulatory database report provided by Environmental Data Resources (EDR) as part of the Phase I ESA conducted in March 2023. This site is beyond the minimum distance noted above and is therefore a VEC does not exist. Quebecor Printing site listed above was identified as VAPOR, INST CONTROL, VCP, SRP, and NPDES site by EDR. The site is down and/or cross gradient of the site and is within the minimum screening distance and directly across the street for the subject property. Based on the non-petroleum chemicals present and the distance to the adjacent Quebecor property, a VEC exists. Regions Bank (a.k.a. Texaco, Duffer-Taylor General Tire and Kennedy's Pat Auto Repair) site listed above was identified as a VCP, SRP, LUST, UST, HIST UST, and HIST AUTO site by EDR. The site is upgradient and within the minimum screening distance for petroleum contaminants and a VEC does exist in connection with the subject property. Kingsport Transit site listed above was identified as a LUST, INST CONTROL, VCP, and SRP site by EDR. Based on the upgradient and/or cross gradient position for dissolved contamination in the groundwater, a VEC does not exist as it is beyond the minimum screening distance. Both Quebecor and Regions Bank are considered a VEC and thus a REC for the subject site.

Conclusion

Based on the processes described herein, the following conclusion was drawn from this VES: A VEC with respect to the subject site exists for the site as listed in Table 2.

Tier 1 Vapor Encroachment Screen Tax Parcel 063 002.02, 396 and 398 Innovation DriveJohnson City, Tennessee 37604 S&ME Project No. 22400078

Carol Goldinger Ford, PG, LEED® AP BD+C Senior Project Manager/Geologist

Ms. Ford has more than 30 years of experience split between geotechnical, environmental, and industrial hygiene services. She is skilled in the following disciplines: project management; subsurface investigations, environmental assessments, groundwater tracing events, underground storage tank assessments and remediation, quality assurance/quality control supervision. New skills include monitoring and evaluating real-time instrumentation data during drilling and grouting for a seepage mitigation project. Has managed projects related to mold assessments, odor assessments, worker exposure monitoring, asbestos, lead, and LEED® Indoor Air Quality Testing.

Key Projects and Assignments

Cedars/Russell Sawmill Phase I ESA, Limited Phase II ESA, and Remediation Plan

Lee County, Jonesville, Virginia | 2014 - 2015

Senior Project Manager, responsible for conducting the Phase I and Limited Phase II ESAs and review of Remediation Plan for 111 acre tract of land. Limited Phase II ESA included passive soil gas sampling, groundwater and surface water sampling with results from the soil gas sampling leading to subsurface exploration of the soil at specific areas of concern. Results of the Limited Phase II ESA lead to the preparation of a Remediation Plan and Bid Document which included demolition of a portion of the site along with an asbestos abatement plan for limited areas of asbestos-containing materials.

Heartwood Forestland Fund IV, LP Phase I ESA

Russell County, Virginia | 2010

Project Manager responsible for conducting the Phase I ESA on 12,296 acres in Russell County, Virginia. Phase I ESA was completed using the Forested Land ASTM Standard E2247-08 by conducting aerial map review, flyovers, and ground reconnaissance on accessible roads.

Phase I and Phase II Environmental Site Assessments

Tennessee and Virginia | 1988-present

Conducted Phase I and Phase II ESAs for municipal, private, industrial, and commercial clients in Tennessee and Virginia. Property acreage ranging from 1 acre up to 125 acres.

Verizon Cell Tower Projects

Tennessee and Virginia | 2010-present

Conducted Phase I ESAs for Verizon site in Tennessee and Virginia.

^{*}Experience with previous employer.

Tennessee Valley Authority

TVA Boone Hydroelectric Power Plant Seepage Mitigation Project | 2015-2017

Served under contract to Engineer of Record (Black & Veatch) as Lead Dam Safety professional responsible for routine visual inspections of the dam site (24 hours/day), continuous real-time monitoring of onsite instrumentation through various automated data collection systems (ADCS. Instrumentation being monitored daily and continuously include; piezometers, inclinometers, automated total station survey prisms, tilt meters, and water quality stations. Project also included preparing Scopes of Work for specific tasks, in field monitoring of drilling and grouting operations, meeting attendance, and quarterly filter berm inspections as they relate to dam safety.

Tennessee Hydroelectric Power Plants | 2008

Audits then developed basis for revising TVA's Spill Prevention Countermeasures and Control (SPCC) Plans, Best Management Practices (BMPs) and Spill Response Plans.

Proposed Loudon Pipeline Expansion Project Loudon and Monroe Counties, Tennessee | 2015-2016

Senior Project Geologist providing field reconnaissance, sinkhole assessment, permitting services, mitigation/repair options, electrical resistivity imaging, regulatory interface, and report preparation for Spectra Energy's natural gas pipeline expansion project in Loudon and Monroe Counties Tennessee. A 10 mile long proposed pipeline landscape was evaluated to assess potential karst features and karst topography within the construction work area. Electrical resistivity imaging in certain "critical" sections provided additional subsurface information concerning possible subsurface karst features (i.e., anomalies/voids/fissures/tubes/caves) for general pipeline construction followed by excavation monitoring in certain anomaly locations.

Proposed Eastman Mainline Pipeline Extension

Sullivan County, Tennessee; Washington and Smyth County, Virginia | 2013

Senior Project Geologist providing field reconnaissance, sinkhole assessment, permitting services, mitigation/repair options, electrical resistivity imaging, regulatory interface, and report preparation for Spectra Energy's natural gas pipeline expansion project in Tennessee and Virginia. More than fifteen miles of proposed pipeline landscape was evaluated to assess potential karst features and karst topography within the construction work area. Electrical resistivity imaging in certain "critical" sections provided additional subsurface information concerning possible subsurface karst features (i.e., anomalies / voids / fissures / tubes / caves) for general pipeline construction, deep horizontal drilling beneath a river, and boring equipment staging areas.

^{*}Experience with previous employer.

Proposed TWRA Aquaculture Water Supply, Fish Hatchery Facility, Region 4 Upper East (020)

Elizabethton, Carter County, Tennessee | 2010 to 2011

Senior Project Manager, responsible for developing and implementing the Technical Specifications for the proposed TWRA Region 4 - Aquaculture Water Supply Testing project. Seven key tasks were completed: 1) evaluated potential yield in gallons per minute (gpm) from Ball Park Spring; 2) sampled and monitored Ball Park Spring and the Watauga River during the yield evaluation testing for required parameters outlined in specifications; 3) evaluated the sustainable yield of Ball Park Spring and connectivity to the Watauga River; 4) collected video camera images of the 24-inch diameter steel pipe; 5) conducted hydrostatic pressure testing of the 24-inch diameter steel pipe from the spring house to the pump house; 6) evaluated feasibility of reuse of the 24-inch diameter steel pipe; and 7) prepared summary report of findings presented to Joint Venture Design Team for submission to State of Tennessee for future funding.

Southwest Virginia / Eastern Kentucky Coal Fields Experience*

Senior Project Geologist responsible for monitoring rock core drilling, installation of extensometers and piezometers, conducting pressure testing of boreholes, and vane shear testing on fine refuse. Conducted weekly site inspections as an MSHA impoundment inspector for routine monitoring of the impoundment structure including: seeps, underdrain flow, slips, phreatic water level measurements, extensometers measurements, pool elevations, fines elevations, crest elevation, coarse refuse density testing, and reporting. Assisted with field reflection geophysical survey to determine existence and limits of abandoned mine workings. Conducted dye tracing studies to determine flow possibly by passing decant system at impoundment sites.

Provided support to three coal clients during remediation efforts to seal auger workings, seal subsidence fractures and mine openings below and above pool elevations after slurry spills, and conducted investigation with MSHA by monitoring the drilling and video camera imaging of numerous boreholes and construction of temporary holding impoundments for coal sludge between the years 1996 – 2000.

James R. Bruce, PG, CHMM

Geologist

Mr. Bruce has over 30 years of experience in planning, executing, and managing environmental assessment and remediation projects. He also has experience implementing remediation designs he has prepared, as well as designs prepared by others. Mr. Bruce's work has included both government and private clients. He is experienced in facilitating interactions between owners, regulators, and other stakeholders during the assessment and remedial design process. Mr. Bruce has successfully managed many complex EPA-grant funded Brownfields Inventory and Assessment projects bringing them to completion on time and within budget.

Key Projects and Assignments

Cedars/Russell Sawmill Phase I ESA and Remediation Plan Lee County, Jonesville, Virginia | 2014 - 2015

Senior Reviewer and Document preparer, responsible for senior reviewing the Phase I ESA and preparing the Remediation Plan for 111 acre tract of land. Results of the Limited Phase II ESA lead to the preparation of a Remediation Plan and Bid Document which included demolition of a portion of the site along with an asbestos abatement plan for limited areas of asbestos-containing materials.

EPA-funded Brownfields Community-Wide Assessment - Knoxville Downtown North I-275 Corridor

Knoxville, Tennessee | 2011-2014

Project Manager for community-wide assessment grant project under EPA Brownfields Program. Project activities completed to date include Project Area Environmental Database Inventory and amendment of Generic Quality Assurance Project Plan. Project management and client support activities performed to date include progress reporting and assistance with the grantee's ongoing community outreach efforts. Responsibilities have included facilitating ongoing interactions between owners, regulators, and other stakeholders to obtain property access for assessment implementation. Project requires coordination with federal EPA and state regulatory personnel involved in oversight of the Grant.

Verizon Wireless

Multiple Locations, Southeast US

Senior Reviewer and Project Manager for Phase I ESAs, Phase II ESAs, asbestos and lead-based paint surveys, and soil management plans. Projects include both existing cell tower sites, undeveloped "greenfield" properties, and small-cell deployment sites at existing retail, hotel, entertainment, and sports venues. The projects are typically accelerated turnaround (10 working days) and require extensive coordination between the client, site development, engineering consultants, and legal teams.

S&ME 2015 Fees, \$1.6 million - Verizon fees for 2016 - \$1.75 million

^{*}Experience with previous employer.

EPA-funded Brownfields Community-Wide Assessment - Knoxville South Waterfront

Knoxville, Tennessee | 2009-2014

Project Manager for community-wide assessment grant project under EPA Brownfields Program. Project activities include preparation of Project Area Environmental Database Inventory, Phase I Environmental Site Assessments (ESAs), Generic and Site-Specific Quality Assurance Project Plan Preparation, and Phase II ESAs. Phase I assessment projects completed include a 3-acre metal fabricating facility, a 23-acre medical facility compound comprised of 6 individual parcels and a former drycleaner and petroleum bulk plant. Project management and client support includes preliminary remedial planning, progress reporting and assistance with the grantee's ongoing community outreach efforts. Phase II ESAs included the collection of passive soil vapor collector samples, surface and subsurface soil samples, groundwater samples, soil gas, sub-slab and ambient air samples. Responsibilities have included facilitating ongoing interactions between owners, regulators, and other stakeholders to obtain property access for assessment implementation. Project requires coordination with federal EPA and state regulatory personnel involved in oversight of the Grant.

EPA-funded Brownfields Community-Wide Assessment East Tennessee | 2008-2010

Project Manager for 16-county, community-wide assessment under EPA Brownfields Program. Project included the implementation of nine Phase I ESAs for properties previously operated as a knitting mill, furniture manufacturer, historical landfill, petroleum bulk plant, scrap metal yard, former gasoline service stations and riverfront corridor. Other project activities included successful implementation of a Phase II ESA at a former historical landfill site and a Phase II ESA at a property encompassing both a petroleum bulk plant and furniture manufacturer. Both Phase II ESAs included the collection of passive soil vapor collector samples, surface and subsurface soil samples, groundwater samples and soil gas samples. Facilitated interactions between owners, regulators, and other stakeholders to obtain property access for assessment implementation. Project required coordination with federal EPA and state regulatory personnel involved in oversight of the Brownfields Grant.

EPA-funded Brownfields Assessment – Car Works Site Lenoir City, Tennessee | 2006-2008

Project Manager for the assessment of a 95-acre abandoned rail yard under EPA's Brownfields Program. This project was of particular importance to the Loudon County Economic Development Agency thus requiring close interaction with the local and state authorities responsible for approval of alternative cleanup options. Project included investigation to determine the distribution of lead and arsenic in soils and foundry sands historically deposited across approximately 60 acres of the site. Facilitated interactions between owners, consultants, regulators, and other stakeholders to obtain property access for assessment, implementation,

and preparation of conceptual redevelopment design. On-site project activities included the clearing of sampling corridors along densely vegetated areas of the site, installation of 330 surveyed test pits to facilitate surface and subsurface sampling for chemical and geotechnical parameters, and characterization of foundry sand thickness across site. Investigative activities performed also included off-site soil vapor, sediment, and surface water sampling to measure for potential impacts on adjacent properties.
